Message by the Governor And Lieutenant Governor of American Samoa

We take great pleasure in presenting the 2000 Statistical Yearbook of American Samoa. The Yearbook is an official summary of statistics on social, economic, and political organizations of American Samoa that provides a useful source of information for local community and leaders in government, business and civic organizations.

We sincerely hope this publication will stimulate your interest in the social and economic future of our island. Please feel free to contact the Department of Commerce or the relevant sources if you require additional information.

TAUESE P. F. SUNIAGovernor of American Samoa

TOGIOLA T. TULAFONO Lieutenant Governor

ACKNOWLEDGEMENTS

The 2000 Statistical Yearbook is the twenty-second annual publication of compendia, detailing both historical and current economic and social characteristics of the territory. The Statistical Yearbook serves both as a summary of aggregated statistics about American Samoa and also as a guide to source references of information and detailed subject-matter specifications then can be presented here.

We would like to commend the many government agencies (both local and federal), private businesses and individuals who have contributed diligently in making this publication possible.

We hope that the users of this book will find it useful and informative. We welcome comments and suggestions for improving the Statistical Yearbook series. A self-addressed suggestion and comment sheet is provided at the end of the book for you to provide us with your comments.

ALI'IMAU H. SCANLAN JR. Director Department of Commerce Commerce VAITOELAU FILIGA Chief Statistician Department of

GENERAL INFORMATION ABOUT AMERICAN SAMOA

History

Although the exact date will probably never be determined, most archaeologists believed the first Polynesians settled in what is now American Samoa around 600 BC. By that time, Polynesians had established themselves on the eastern tip of Tutuila near the village of Tula. These first inhabitants probably arrived from Tonga and the Samoa's from the west, perhaps by the way of Indonesia, the New Hebrides and Fiji.

Samoa's long isolation from the western world ended in 1722 when the Dutch explorer, Jacob Roggeveen, came upon the islands. It wasn't until 1831, however, that European influence had any real impact. In that year, John Williams of the London Missionary Society arrived with eight Tahitian missionaries. Samoans took to Christianity with enthusiasm and remain deeply religious to this day.

By the 1900 both Germany and the United States were claiming the Samoan Islands. Germany annexed several islands, which now comprise Western Samoa; the U.S. took Tutuila to use Pago Pago Bay as a coaling station for naval ships.

As Japan began emerging as an international power in the mid-1930s, the US Naval station on Tutuila began to acquire new strategic importance. By 1940, the American Samoa Islands had become a training and staging area for the US Marine Corps. It was this massive influx of Americans that – for better or worse – gave American Samoans a sudden taste of the benefits of a modern western society.

Fortunately for the islands and for the Samoan people, none of the fighting

which scared so many of the Pacific Islands during World War 11 ever reached Samoa. In 1945, the Marines left as suddenly as they had arrived, and American Samoa returned to the quiet, peaceful way of life it had enjoyed before the great conflict.

Today, American Samoa is an unincorporated territory of the United States administered by the Department of the Interior.

Geography

American Samoa covers an area of 77sq. miles and lies 3,680km (2,300 miles) southwest of Hawaii, 2,560km (1,590 miles) from the northernmost tip of New Zealand and along 14 degrees latitude south of the equator. Its immediate neighbor is Western Samoa, an independent state 128km (73 miles) to the west. The administrative center and capital of American Samoa is Pago Pago on the main island of Tutuila.

Tutuila contains the spectacular Pago Pago harbor, which cuts deep into the island's south central shoreline.

Approximately 1km southeast of Tutuila's eastern tip is the island of Aunu'u. The islands of Ofu, Olosega and Ta'u lying 160km (90 miles) to the east of Tutuila are referred to as the Manu'a Group. Swains Island (an atoll near the Tokelau Islands Group) lies about 200 miles north of Tutuila and is part of American Samoa.

Climate

American Samoa's climate is typically tropical, with temperatures

seldom exceeding the mid-80. Nights are balmy and cooling trade winds blow almost constantly. As in most tropical areas, there are frequent heavy rains but, even during the so-called rainy season (December-March), there are extended periods of bright sunshine on a daily basis. Generally, the weather is sunnier from June through September.

Population

The official population count of American Samoa as of April 1, 2000 is 57,291. The mid-year estimate for the same year of 57,700 is calculated from vital registration and inter-censal migration. The current estimate showed an increase of about 900 persons from the 1999 estimate of 56,800. The annual population growth rate calculated from the 1990 and 2000 was 2.0 percent compared to a 3.7 percent annual growth between 1980 and 1990. American Samoans are classified as American Nationals.

Tourism

The government encourages tourism, seeing it as an important contributor to the economy and also as a chance for outsiders to learn more about the Samoan culture and see it's beauty. Close to 7,000 real tourists passed through American Samoa in 2000. The visitor finds beautiful beaches on these lush greens volcanic islands, unspoiled pristine villages and coastal area, tropical flowers and shrubs, sleepy lagoons and encircling coral reefs – a good atmosphere for relaxation.

Economy

Canned tuna remained as the principle-manufactured commodity of the

territory. Two major US tuna canneries adjoining Pago Pago harbor form the backbone of the local economy providing a thriving fish cannery industry employing close to 5,000 workers. Fishing boats from the US, New Zealand, Korea and Taiwan supply catches to the canneries. In 2000, the canneries shipped out close to \$340 millions worth of canned tuna to the US.

Local commerce operates mainly to support goods and services directly or indirectly to the tuna canneries and the American Samoa Government. Local businesses consist mainly of small retail outlets and family transportation.

Unless exempted, every business operating in American Samoa must maintain an annual business license. Only those carried on by, or directly and solely for local government or US Government, or farmers marketing their own product in its natural state are exempted. Corporations organized under laws other than those of the territory are by definition "foreign" and must obtain a separate permit to transact business.

Communications

Good communication systems are available in American Samoa. The Comsat satellite system has brought new improved telephone and high facsimile quality and television services. Through this system the territory is in direct touch with countries in the Pacific Basin and also with more than 100 other nations. The territory itself has more than 11,000 installed telephones on single, twoparty and multi-party lines. High technology and information superhighway is very much alive in American Samoa with reasonable connections to the United States and

Worldwide markets. Telex and telegraph services are also available. The post office is part of the US system. The same standard postal rates apply in American Samoa.

Transport

Pago Pago's commodious harbor is noted for its deep water and few navigational hazards. Regular and fully containerized shipping services link with West Coast US, Honolulu, New Zealand, Australia, Japan and regional Pacific Island countries.

The island government is anxious to maintain Pago Pago as a major Transshipment and trading center for the South Pacific. Incentives are given by waiving port charges and dues up to 30 to 60 days for Trans-shipment freight passing through. Bunkering, stevedoring and fuel prices there are amongst the most competitive in the Pacific. Well-equipped docks can handle merchants or passenger ships of all types.

The international airport at Tafuna is 15km (9 miles) from the capital by a good tar sealed road. Regular jet services connect with the US, New Zealand, Australia, Fiji, Tonga, Vanuatu, New Caledonia, Tahiti, and the Cook Islands. Airlines are Hawaiian Airline, Polynesian Airline, Samoa Air, and Air New Zealand and Air Nauru via Apia or Nadi.

TABULAR PRESENTATION OF

AMERICAN SAMOA'S STATISTICAL YEARBOOK IN 1998-1999 COMBINED

Explanatory Notes: The following symbols used in the tables throughout this publication are explained in enclosed form in footnotes to the tables where they appear.

- Represents zero or rounds to less than half the unit of measurement shown
- Not available or not applicable
- (E) Estimates
- (P) Preliminary
- R Revise
- (D) Data withheld to avoid disclosing data for individual farms

*Calendar Year is used unless otherwise specified

Head-notes immediately below table titles provide information for correct interpretation or evaluation of the tables as a whole or for a major segment of it.

Unit indicators ("In thousands", "In millions of dollars", etc.) are usually given as the first element of the head-notes. In tables where several units are used, the unit indicators are generally given in the stub in the column headings.

Footnotes below the bottom rule of tables give information relating to specific items, figures or symbols within the tables. In many tables, details will not add exactly to the totals shown due to rounding.

All annual statistics should be understood as referring to calendar years unless otherwise indicated.

Government Fiscal Year starts from October of previous year to September of current year.

Method of Order

Copies of this report may be obtained for \$15.00 each from the Department of Commerce at Utulei, Executive Office Building, second floor, or may be ordered from outside the Territory by sending a money order for \$20.00 per copy, (postpaid) to the Department of Commerce, American Samoa Government, Pago Pago, American Samoa 96799.=

LIST OF TABLES

Table No.	Table Title	Page No.
·	POPULATION	
1.1	Principal Physical Features of Island Countries in the South Pacific: 1995	2
1.2	Census Population and Annual Growth Rate: 1900 to 2000	3
1.3	Population Density by District: 1900 to 2000	4
1.4	Mid-Year Population Estimates: 1965 to 2000	5
1.5	Migration and Natural Increase: 1970 to 1990	5
1.6	Population Projection by Age Group and Sex: 2005 to 2025	6
1.7	Census Population by Age: 1974 to 2000	7
1.8	Males by Age: 1970 to 1995	8
1.9	Females by Age: 1970 to 1995	9
1.10	Census Population by District: 1900 to 2000	10
1.11	Population by Village: 1980 to 2000	11-12
1.12	Sex Ratio: 1908 to 2000	13
1.13	Median Age by Sex: 1950 to 1990	14
1.14	Percent Never Married and Age at First Marriage: 1956 to 1990	14

STATISTICAL YEARBOOK 2000

Section 1

POPULATION

This section presents statistic data on growth, geographic distribution and composition of the population of American Samoa.

American Samoa is ranked 3rd in the Pacific Region with high population growth. With only about 200 square kilometers (77 square miles) of land area, we have a current population density of 286 persons per square kilometer.

The 2000 population, as a result of the April 1, 2000 American Samoa Census, was 57,291. This represents an increase of 10,518 persons (or 22 percent) since the previous population count of 46,773 in April 1, 1990. In contrast to the 1990 Census report, the 2000 Census reflect a much lower annual growth rate (2.0 percent) compare to the 1990 Census, which was 3.7 percent annual growth rate between 1980 and 1990.

The population is unevenly distributed within the Districts. The Western district holds the largest population of 32,435. The high concentration of people situates more within the Tualauta area (22,025). This is strictly due to the increase in people buying individually own land and building new homes.

Our population is very young. The median age of the local population remained at about 21.3 years: demanding much needed services for education, health and medical, family advocacy, and employment opportunities.

The general gender ratio in 2000 was 104 males for every 100 females, which is a slight dropped compared to the 106 in the 1990 report. The latest on the Total Fertility Rate (TFR) is the 1990 Census, which dropped from 6.2 in the sixties to 4.5. Likewise, Single Mean age at First Marriage for women dropped from 22.9 to 25.6 years, which indicate a delayed marriage and social/economic participation.

THE SOUTH PACIFIC: 1995								
				Population	Percent

STATISTICAL YEARBOOK 2000

Section 2

Vital statistics

This section present data on births, deaths, life expectancy, marriages, diseases, out patient visits, and hospital discharges.

The live birth rate has slightly decreased from 1,736 in 1999 and 1,730 in 2000. In comparison with the 1990 data collection, we encounter a 6 percent decline in live births. The 2000 average number of newborns in a month was 145 or 5 newborns each day. The highest percentage of live birth came from mother's age range of 25-29, which was twenty-nine percent. Out of 1,730 live births, 1696 were born single and 17 were born twins.

The number of deaths also dropped from 249 in 1999 to 224 in 2000. The average number of death in a month 144. Four percent of the total number of death were infants under one year of age. Yet, reassure that the infant death rate has decreased among the years. The total death rate for both males and females has also dropped. The male death rate detains about 61% of the total death rate.

The total cases of notifiable disease reported in 2000 increased fourteen percent compared to 2000. Scabies is the leading health complaint with 221. Chicken pox (109) and Food poisoning (101) follows.

Total outpatient visits to the LBJ Medical Center recorded at 161,146; an increase of about less than a percent from the 1999 figures. The Emergency room/OPD has continuously though out the years received a record of most visits (40%) followed by the Dental clinic (14%). Compare to 1999, Emergency room/OPD received the highest (43%) of 159,672 and Pediatric clinic followed with 11 percent.

A total of 267 marriages took place in 2000, compared to 272 in 1999. The average number of marriages per month in 2000 was 22. A reduction trend in marriages continue from 335 to 267 since 1997

A life table for the Territory of American Samoa was developed with the assistance from the South Pacific Commission's Demography Program. This life table (male and female) was developed due to the demand of life expectancy data in the territory. The life expectancy for Male is 69 years compared to Female with 76 years.

STATISTICAL YEARBOOK 2000

Section 3

EDUCATION

This section presents statistical data on school enrollment, educational achievement and institutions.

Enrollment in preschool, elementary, secondary, special education, and college in 2000 totaled 19,484 (slightly more than the preceding year by less than 1 percent). There were 105 educational institutions in 2000: an average of 185 students per institution compare to the 107 in 1999.

School enrollment in the territory continued to increase as more and more kids enter school ages. Over half of the total enrollment was elementary school children, followed by high school enrollment with a little more than 4,000 students. Out of the 4,051 high school students, only 7 percent attended private schools.

The preschool enrollment declined by about one percent. Similar situation apply to the K Program, it fell 7%. Both Elementary and Secondary enrollment went up in 2000. Enrollment at the only Community College dropped from 1,155 in 1999 to 956 in 2000 (a 17 percent drop). Total degrees and certificates awarded by the Community College in 2000 was 155.

In the census of 1990, 16,132 persons (35 percent of the population) were enrolled in school. Only 16 percent of those below the age of 4 were enrolled in early education, and about 90 percent of those aged 5 to 9 years were enrolled in school. Likewise, 94 percent of those 10 to 14 years were in school. Assuming that those in ages 5 to 14 years constituted the elementary level (K5 to Grade 8), showed that 10 percent of the elementary school aged children were not in school in 1990. Similarly, about 30 percent of those in high school ages were not in school.

Of the 19,570 person's 25 years and over in the 1990 census, 55 percent were high school graduates, and only 7 percent have attained bachelors or higher degrees. Only 1,710 (6 percent) of persons 16 to 64 years have completed requirements for a vocational training program.

STATISTICAL YEARBOOK 2000

SECTION 4

LAW ENFORCEMENT

This section presents statistical data on crime, traffic accidents, firearm registration, jail population, fire, and court activities.

Total offense reported to the Department of Public Safety decrease by 13 percent fro the previous year.

The five major offenses reported were disorderly conduct, accounting for 26 percent; assault (1st and 2nd), 11percent; burglar, 9 percent; driving under the influence, 7 percent; and property damage/ vandalism with about 6 percent.

The Reported crime committed by Juveniles in 2000 again decline for the third consecutive year. Runaway accounted for 18 percent of all juvenile crimes; follow by burglary with 1 percent and disorderly conduct with about 11 percent.

The number of firearms registered in the territory decreased from 277 in 1999 to 255 in 2000. Shotguns and rifles accounted for about 88 percent of the total registration.

A total of 9,469 cases were filed in the District Court of American Samoa. About 87 percent were disposed of before the ending of the year.

Of the 668 cases filed in the High Court of American Samoa, 420 cases were disposed before the end of the year. About 2,762 cases were pending from the previous year.

STATISTICAL YEARBOOK 2000

Section 5

CLIMATE

This section presents climate data for American Samoa.

American Samoa has a maritime climate with abundant rain and warm, humid days and nights. The rainfall total for 2000 was 115 inches with 1998 the driest year with only 60 inches of rainfall at the airport. This number varies over small distances because of topography.

The driest month are June through September (Southern Winter) and the wettest from December through March (Southern Summer). However, the seasonal rainfall may vary widely in individual years, and heavy showers and long rainy period can occur in any month.

May through August are the coolest months in 2000 with monthly average temperature of 81.7.9, 81.4, 80.0 and 81.6 degrees respectively, while December through April were the hottest months with 83.7, 83.8, 83.8, 83.1 and 83.8 degrees respectively.

The prevailing winds throughout the year are the Easterly Trades. These tend to be more directly from the East in December through March, but predominantly from East-Southeast and Southeast during the rest of the year. The trade Winds are also less prevalent in summer than in winter. As the foregoing suggests the trades maybe interrupted more often in summer than in winter. These interruptions are sometimes associated with the proximity of small tropical storms, of bands of converging winds, or of low pressure systems higher in the atmosphere, all of which help make summer the rainy season. At other times, the absence of the trades is marked by periods of light and variable wind and by land and sea breezes. Westerly to northerly winds, in particular are more frequent then. These are strong at times, but are often quite light, and may then reflect the nighttime drainage of cooled air from the mountains west and north of the airport.

The average monthly temperature in 2000 was 82.5 degrees, which compared to 81.7 degrees in 1999. Comparing back to the past five years, 1998 stands to be the hottest year with 84.5 degrees.

STATISTICAL YEARBOOK 2000

Section 6

LAND USE/OWNERSHIP, HOUSING CHARACTERISTICS, AND BUILDING PERMITS

This section presents statistics on land use, land ownership and tenure, housing characteristics, building permits, type and value of construction activities.

Total land area in American Samoa is 48,767 acres and about two thirds of the land is steeply sloping and virtually inaccessible. From a Land Use Study of American Samoa conducted in 1977, about 34 percent of developed land (7,831 acres) was for Residential, Commercial or Industrial purposes. Another 24 percent for Agricultural; 14 percent for Government use; 12 percent each for Transportation, Communication and Church use, and the remaining 4 percent used for Educational & Recreation.

A total of 7,620 acres of land was registered with the Territorial Registrars Office in 2000 (a slight increase of about 52 acres from 1999.) Much of this increase in land registration is due to Communal Land use as registered by families and builders.

A total of 8,908 housing units were counted in the 1995 household survey compared to 6,959 counted in 1990. Of the 8,908 units, 6,906 were owner occupied, 1,461 were renters and 541 vacant units. About 84 percent were single detached units, compared to 90 percent in 1990. The median number of room per housing unit in 1995 was 4.6 versus 4.5 in 1990 and to 3.5 in 1980. The average number of persons per occupied housing unit in 1995 was 6.

A total of 644 land use permits were processed in 2000 compared to 715 in 1999. Total value of all construction (private capital investment) excluding government projects was estimated at \$12.8 millions.

Table 6.12.NUMBER AND ESTIMATED VALUE OF BUILDING
PERMITS: 1980 TO 2000

NOTE: Estimated value of construction for 1980 to 1988 was done by the Research and Statistics Division, EDPO, based on permit fees assessment. Estimated value of construction from 1989 to 1997 were extracted from monthly reports submitted by the Building Branch Division, Department of Public Works. Estimated value for 1990 did not include value for all FEMA houses built after Ofa; although, the number of FEMA permits issued were included. Thus number of permits in 1990 increased by 265 percent due to Hurricane Ofa. Estimated value in 1992 included a \$5 million single major project at the Industrial Park Value of all government projects are excluded from estimated value of Construction

STATISTICAL YEARBOOK 2000

Section 7

INTERNATIONAL ARRIVALS AND DEPARTURES

This section presents statistics on arrivals and departures by purpose of travel and citizenship.

Over 95,000 travelers arrived or passed thorough the territory in 2000. About 43 percent of those travelers were residents returning to American Samoa. All visitors including business travelers, tourists, visit families and relatives and short employment accounted for about 53 percent of all travels. Visit families/relatives and friends alone accounted for about 55 percent of visitors. Of the citizenship of travelers, over 45 percent were Samoan citizens and mostly here visiting families and relatives. American Samoan nationals accounted for about 26 percent of travel.

Tourist in 2000 dropped again from 6,863 in 1999 to 6,333 after favorable increases since 1997. Business travelers continued to increase and doubled in number since five years ago. The US continued to be our main tourism market with about 57 percent of all tourist arrivals. The New Zealand/Australia market held about 34 percent followed by the Europe market with about 4 percent.

A total of 88,397 travelers departed American Samoa in 2000. Of those, 40,753 were residents leaving, amounting to a net loss of 575 residents. It is noticed that this trend has continued in the past five years. Since 1995, American Samoa has lost close to 7,000 residents.

STATISTICAL YEARBOOK 2000

Section 8

ELECTION

This section presents data on election statistics-voter registration and participation by voting districts, village, age and sex.

A new registration and verification system with issuance of Voter Identification Cards began in 1994. In the last general election of November 7, 2000, 15,598 voters were registered and verified. The new system has now bypassed the more than 15,000 names in the Official Roll of Registered Voters back in 1992.

Over 52 percent of registered voters were women. Most of them (52 percent) were between the ages of 18 to 34 years. Over 12,000 or 77 percent of registered voters cast their vote in the 2000 General Election. The Representative District of Tualauta continued to hold the most voters with 2,428; followed by Ituau with 1,900; Maoputasi Number 9 with 1,169 and Fofo with 1,071. The rest of the representative districts had less than a thousand voters. Likewise, Tualauta had the highest voter turnout with about 88 percent. Representative District Number 2 – Manu'a followed with about 83 percent of voter turnout and Ituau with 81 percent.

STATISTICAL YEARBOOK 2000

Section 9

GOVERNMENT FINANCE

This section presents statistics relating to the American Samoa Government revenues and expenditures.

The American Samoa Government collected revenues totaling \$144.4 millions and spent about \$152.9 millions resulting in an FY-1997 deficit of about \$8.5 million. However, the cumulative deficit had grown to \$34.5 millions at the end of fiscal year.

In the FY-1997 Government Financial Report, Intergovernmental-DOI grant accounted for 67.4 percent of all revenues while taxes collected locally accounted for \$34.1 millions or 23.6 percent. General Fund revenues amounted to about \$63.0 millions and expended \$74.1 millions resulting in a deficit of the General Fund of \$11.1 millions. Contributing to the continuous General Fund deficit is the lopsided trend in spending versus collection. In the five year series, collection increased by an annual average of about 3.6 percent while spending moved at a much faster pace of 7.8 percent annually. Until both sides of the General Fund situation equalizes, efforts to reduce the current deficit will be fruitless.

Local government revenues (mostly taxes, charges and fees) accounted for only 33 percent of total revenue. Taxes increased steadily from about \$27.2 millions in FY-1993 to \$34.1 millions in FY-1997. Fines and Fee collection also improved in the past five years while Charges for Government Services continued to drop in the same period. Of the \$97.3 total grants received by the local government in FY-1997, \$70.2 millions were Special Revenue (i.e. Federal Grants, Hurricane Val Funds and Deficit Reduction Funds).

With a new list of additional expenditure categories in the FY-1997 Government Financial Report, it was difficult to appropriately discuss trends of functional expenditure. However, the overall pattern indicated continuous growth in government spending (moving at an average annual rate of 12.6 percent in the past five years.) This growth increased from \$97.3 millions in FY-1993 to \$126.2 millions in FY-1995, and then to \$152.3 millions in FY-1997. Health and Education Services spent close to 60 percent of the government bill.

STATISTICAL YEARBOOK 2000

Section 10

LABOR FORCE, EMPLOYMENT AND EARNINGS

This section presents statistics on labor force, wages, income and poverty.

Total employment in 2000 was estimated at 15,300 (an increase of about 1.4 percent from the preceding year.) The estimate included close to 6,000 jobs at the Secondary Sector (the rest of the private sector and quasi government operations), about 5,000 jobs at the local canneries and about 4,400 government jobs. Of the 4,391 government jobs, 953 were contract workers (all contracts including short-term, 1 year and 2 years contracts) and 3,216 were career service workers. Despite this drop in government jobs, public sector employment is still estimated at above 5,000 due to quasi government operations and authorities that are somewhat part of government operations.

The household survey of 1995 provided updates on labor force participation of the local population. A total of 13,785 workers were reported compared to 13,461 in 1990. Over 50 percent of workers in 1995 were born in American Samoa compared to 38 percent in 1990. On the other hand, Western Samoan workers accounted for 44 percent in 1995 compared to 46 percent in 1990. Most American Samoan born were employed in Professional and Related Industries (29 percent) followed by Public Administration (26 percent) and Manufacturing with 21 percent. The Western Samoan born were mostly in Manufacturing (46 percent) followed by Professional and Related Industries with 10 percent. Similar trends were seen in the 1990 census data except that the 1995 proportions of foreign workers have slowly moved into higher paid jobs.

Minimum wages for various industries in American Samoa are reviewed every two years. For 2000, minimum wages were the same as in 1999.

Average household income in 1994 slightly dropped from \$16,114 in 1989 to \$15,715. However, this drop is not necessarily due to a drop in income but a decline in the number of persons in household (contributors to total income). The per capita income (which is not affected by number of persons in households) increased in the same period from (\$3,039 in 1989 to \$3,270 in 1994.) For both years (1989 and 1994), 11 percent of households had income less than \$5,000 a year, while households in the \$50,000 income bracket slightly dropped from 7 to 6 percent. Most households in 1994 were in the \$15,000 to \$25,000 income brackets. The median income for males aged 16 years and over in 1989 was \$7,151, while females was \$5,952. Of the 6,301 families, 3,563 (56 percent) were below the poverty level as determined by the Federal Government. More than 90 percent of families below the poverty level had children less than 18 years old.

STATISTICAL YEARBOOK 2000

Section 11

PRICES AND EXPENDITURES

This section presents data on the local Consumer Price Index (CPI), average prices of selected commodities and annual household expenditures for the territory.

The American Samoa Consumer Price Index is designed to measure price changes of commodities and services normally purchased by the community. Like the U.S. Consumer Price Index, it is based on the concept of representative "market basket"; a sample of goods and services the consumer purchased. The American Samoa CPI began in 1974. Weight distributions (representing relative importance of each commodity to total expenditure) were aggregated to CPI Groups and Subgroups. Two major CPI updates were conducted; the first re-base was done in 1982 and another in 1997. These re-bases were necessary to reflect consumer preferences and market changes.

Current CPI is now registered at an average of 104.2 index points. Average inflation is running at about 2 percent in 2000. Tobacco and Alcoholic Group had increased by 40 percent since 1977.

Household expenditure was last collected in 1995. The 1995 survey report indicated a total expenditure bill of almost \$204 millions for all households in the territory. A household in the territory with an average size of 6 persons spent an average of about \$24,000 compared to \$18,318 in 1988, and \$12,235 in 1982. More than 50 percent of households spending were for food and housing. Special expenditures such as church donations, wedding, matai title, funeral, gifts, family *fa'alavelave* accounted for 21 percent of household spending.

STATISTICAL YEARBOOK 2000

Section 12

COMMUNICATION AND TRANSPORTATION

This section presents statistics on communication services, registration of motor vehicles, driver's licenses and permits in force, vessel and cargo movement, air-traffic and aircraft operation.

The number of telephone in American Samoa totaled 10,252 in 2000 (a decrease of 14 percent from 1999). For overseas telephone services, over 3 million total of completed calls earning up to 16.3 million revenue minutes. The Telex Service was no longer in service since 1998. The number of Facsimile subscribers in 2000 was 604 (an increase of 7 percent since 1999). The number of cellular instruments decreased by 25 percent and Internet service (@samoatelco.com) continued to increase (11 percent).

Registered motor vehicle totaled 7,314 in 2000; 90 percent for private use and 10 percent for commercial use. American Samoa Government had an inventory of 565 vehicles for 2000, (an increase of 12 vehicles from 1999).

A total of 4,671 drivers licenses in force were reported in 2000; 4,030 were privates and 641 were provisional. Of 1,274 permits issued, 1,168 were commercial and 106 were learner's permits.

A total of 791 vessels entered American Samoa in 2000 versus 851 in 1999. Likewise 799 vessels departed American Samoa in 2000 versus 797 in 1999. Incoming cargo totaled about 520,000 tons (99 percent were unloaded at the waterfront, and the rest at the airport), while outgoing cargo totaled only 215,000 tons.

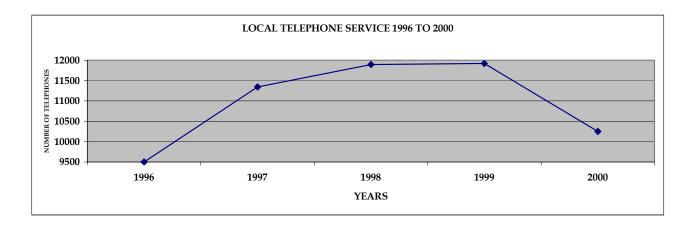

There were 115 incoming and 115 outgoing commercial flights between the Pago Pago-Honolulu route. The average number of monthly incoming flights from Honolulu was 10. Passenger arriving from Honolulu totaled 90,117 and departing totaled 91,826. The busiest months for the Honolulu-Pago Pago route were June, July, and August. The average monthly incoming commercial flights of the Pago Pago-Samoa route were 392. There were 15,732 aircraft operations reported at the Pago Pago International Airport; 242 air carriers; 14,494 air taxi; 345 general aviation; and 651 were military flights.

STATISTICAL YEARBOOK 2000

SECTIN 13

AGRICULTURE AND FISHING

This section presents statistics on agricultural land, farms and farm tenures, field crops and livestock, and local fishing activities.

The number of farmers declined by about 15 percent between 1980 and 1990. However, the average size of a farm increased from 4.5 acres to 7.1 acres. About 88 percent of farms were for home consumption; the remainder was for commercial purposes. Most farms were on the main island of Tutuila. The most common field crop harvested in 1989 was taro, which were grown on 965 acres of land. Of the 726 livestock farms, about 97 percent were hogs and pig farms.

Taro, vegetables and green bananas sold at the local market have dropped in 1998. Taro showed a substantial dropped of about 62 percent. Yams have increased its sales at about 67. Less than 150,000 pounds of breadfruit were sold at the local market in 1998 compared to 219,000 in 1997. A dropped of about 36 percent. Fruits sold in the local market have shown substantial improvement in 1998 compared to the last three years. These figures are probably understated due to the absence of data on local produce sold directly to the stores and food stalls along the roadside.

Since 1994, local fishing activities have been improved. In the year 1998, 989,372 estimated pounds of fish were caught. A slightly increase of 9 percent. Longlining produced the most catch.

STATISTICAL YEARBOOK 2000

Section 14

COMMERCE AND TRADE

This section presents data on trade activities, government purchases and business registration.

The American Samoa Trade Balance remained at a deficit in the past few years. Over \$500 millions worth of imports was recorded in FY2000 compare to \$453 millions in FY1999. Exports increased by \$1.2 millions in 2000. Estimated value of raw fish brought in for canning accounted for over 50 percent of total imports while commercial products for resale, consumption, or reprocessing amounted to \$222 millions.

Of the identifiable list of commodities imported, close to \$65 millions worth of food items were imported in FY2000, however, not all food products brought in went directly to final consumption. Fuel and Oil products accounted for about \$35 millions of imports. Imports from the United States amounted to about \$126 millions followed by Australia with \$33 millions, New Zealand with \$25 millions and Fiji with \$13 millions. Government outside-purchases recorded at about \$14 millions. Canned tuna accounted for \$333 millions of exports followed by Pet Food with about \$10 millions.

Business registration dropped 13% in 2000 compare to 1999. Registration in 2000 had 2,228 businesses versus 2,231 in 1999 and 2,044 in 1998.

STATISTICAL YEARBOOK 2000

Section 15

ELECTRICITY AND WATER

This section presents statistics on electricity production, consumption, sales, number of electric meters and water use.

Electricity production went up slightly in 2000. In 1996, about 142 millions kWh was produced compare to about 169 millions in 2000 (an increase of about 19 percent). Electricity sales had gone up by 22 percent. The fuel cost per gallon in 2000 increased by 53 percent (0.902) since 1999.

A total of 9,988 electric meters were installed through the islands. About 86 percent of those were for residential use while government accounted for 3 percent. There were only seven large power users consuming 41 millions of kwhs.
