

Income and expenditure indicators by poverty and food security status, by geography, sex, age and urbanization (Kiribati, Solomon Islands and Vanuatu)

Data description

Title Food security: Income and expenditure indicators by poverty and food security status, by geography, sex, age and urbanization (Kiribati, Solomon Islands and Vanuatu)

Description This dataset contains a series of indicators related to income and expenditure for Kiribati, Tuvalu and Vanuatu based on Household Income and Expenditure Surveys (HIES). Indicators included are the following: Number of households, Proportion of households, Number of persons, Proportion of persons, Income, Income per household, Income per person, Proportion of income, Expenditure, Expenditure per household, Expenditure per person, Proportion of expenditure. The table provides a breakdown by geography (1 sub-national level), sex, age and urbanization, poverty status (2 categories) and food security status (2 categories). This dataset has been compiled as a result of a collaborative project on food security between the Pacific Community (SPC) and the Food and Agriculture Organization of the United Nations (FAO).

Data identification

Identifier SPC:DF_FOOD_SECURITY_HIES_1(1.0)

Data source

Household Income and Expenditure Surveys (HIES)

Additional comments on the dataset

- Income aggregates represent total annual household income while expenditure aggregates represent consumption expenditure (intermediate expenditure are excluded)
- Sex refers to the sex of the head of household
- Poverty status was calculated by the World Bank while the Food insecurity status is based on FAO's standards sourcing from the Food Insecurity Experience Scale (FIES) module
- Proportions correspond to the percentage of the geographical area to which they relate
