Metadata for Tidal Data Exchange

Station Name

Papua New Guinea

Date of Supply

Tuesday, 7 December 2010

Identification		
Station Number	BoM=200862 ATT=5613 WMO=92036	
Name	Papua New Guinea	
Latitude and	-2.0420	+/- 3m
Estimated Positional Uncertainty		
Longitude and	147.3737	+/- 3m
Estimated Positional Uncertainty	11110101	1, 511
Map Name		1
Map Number		
Map Grid Northing		
Map Grid Easting		
Type of Readings		
Heights	Observations	
Streams	Observations	
Streams		
Constituent constants		
(Delete those not applicable)		
Progress *		
Undote Energy energy *	Real Time	
Update Frequency *		
Available Format Type *	DIGITAL, text	
Measurement Units	1.	
Tidal Heights	metres	
Tidal Streams		
(Delete those not applicable)		
Reference Frame	UTC	
Time Zone	UTC	
Vertical Reference Frame	MSL	
TGBM Name/Number TGBM Elevation relative to the	+/- 2mm Geodetic Detum of Aust (CDA04)	
vertical reference	Geodetic Datum of Aust (GDA94)	
Estimated Positional Uncertainty		
Horizontal Reference Frame	+/-	
Direction of Stream Readings	T/-	
Depth of Stream Readings (relative to		
Vertical Reference Frame)		
Estimated Positional Uncertainty		
Search Words *	Marine Oceanograph	y, Water, Papua New Guinea
Data Owner Details	Marine, Occanograph	ly, Water, I apua New Guinea
Name	National Tidal Centre	
Postal Address		
Street Address	PO Box 421, Kent Town, SA 5071	
Telephone	25 College Road, SA 5071 08 8366 2730	
Facsimile	08 8366 2750	
Email	<u>ntc@bom.gov.au</u>	on o grouphy
Internet Contact Officer Datails	www.bom.gov.au/oce	canography
Contact Officer Details	Devel Develu	
Name	Paul Davill	
Position	Data Manager	
Telephone	08 8366 2730	
Email	ntc@bom.gov.au	
Data Custodian Details

Details of the Readings Provided Herewit		
Date of readings supplied	Son 04	
From To	Sep-94 Current	
The time interval between readings (If	1-minute (average of 60, 1-second samples)	
the readings are for high & low water then enter "Zero")	6-minutes (weighted average of 4, 1-minute readings)	
,	Hourly (filtered with a cut-off of 2 hours)	
Are the readings averaged or filtered	See above. 1-minute samples are logged at the end of each minute, 6-minute centred on 0.1-hour increments	
Are there any access constraints	No	
(such as commercial-in-confidence or		
constraint on the use or distribution to		
third parties).		
Objective Quality Assessment of Tidal Ob	oservations (Height or Stream)	
Instrument		
Туре	Sutron 9000	
Make		
Model		
Sensor	A constituir sin sensen	
Type	Acoustic-in-air sensor	
Make	Aquatrak® Transducer	
Model Mode of operation	Aquatrak NG XCR RS-232	
L	No-232	
Frequency of System Calibrations Field calibration and	every 18 months	
Laboratory calibration	every 18 months	
Frequency of Water Level Checks		
Estimate of the Precision of the Water		
Level Checks		
Time (Std Dev in Minutes)	1mm +/-	
Height (Std Dev in metres)		
System Resolution		
Estimated Local Uncertainty		
Status of the Readings		
Description of the validation process		
including a statement detailing how:-		
 including a statement detailing how:- The instrumental biases were treated 	Standard deviations	
1. The instrumental biases were treated	Reported	
 The instrumental biases were treated Outliers were selected and dealt with 		

Metadata for Tidal Data Exchange

Station Name

Papua New Guinea

Date of Supply

Tuesday, 7 December 2010

Details required with the supply of tidal constituent constants		
All of the details required above		
The name and version of the software	TANS	
used to calculate the constants		
The tidal constituent model used	Doodson's method	
(particularly noting the treatment of		
the constituents Sa and Ssa) and		
specifying any related (inferred)		
constituent constants		
The date span used to prepare the	1994-2007 (for 2010)	
constituent constants		
The reference time zone for the	Local (-1000)	
constituents		
The vertical datum to which the	0.732m below TGZ (2010)	
constituents apply		
A precision estimate of predictions	Standard Deviation is 0.084	
based on the constituent constants (for		
example, standard deviation of the		
analysis residuals)		
Additional details required with the supply of tidal predictions		
All of the details required above		
A statement describing the tidal	Doodson's method	
prediction process used		
The name and version of the software	Tipp4	
used to calculate the predictions		
A list of the constituent constants used	Standard 112 Constituent list	
or if the list is not provided, the donor		
agency's identifier of the list
