

Republic of Kiribati

2020 POPULATION AND HOUSING

General Report and Results

July, 2021

Foreword

The Population and Housing Census (PHC) 2020 is the first in its series of Censuses to adopt the new norm of using electronic equipment for data collection, instead of paper form questionnaires. The switch from manual to Computer Assisted Personal Interview (CAPI) is believed to improve data quality as error checks and all edits are done during the interview.

This connects well the United Nation's theme of "Connecting the World with Data We can trust" and the theme for Kiribati's 42nd Independence Anniversary of "Empowering I-Kiribati to ensure a sustainable and resilient nation embracing the new normal" as the adoption of this new method coincides with the wake of the contagious and deadly COVID19 pandemic which changed our old ways of doing things.

The use of CAPI during the 2020 census is a new normal and great milestone for the National Statistics Office and the Kiribati Government in general. It has been suitably applied during very difficult times when face to face interviewing is not possible due to the contagious disease.

The PHC 2020 is one memorable activity since it was done during the year of the outbreak of two deadly diseases - firstly the measles in Samoa and then the COVID19 pandemic. Kiribati is very fortunate to be less affected with the measles outbreak and free from COVID19 however, the issue with border closure has greatly impacted economic activities and developments as well as travelling to the outer-islands for data collection especially to the Line and Phoenix Islands which requires a transit in Fiji.

Despite these issues and challenges, the PHC 2020 was successfully carried out on all the 33 islands of Kiribati on the targeted census night of 7th November 2020.

I am extremely grateful to the hard working staff of the Kiribati National Statistics Office, our development partners and everyone for their participation in the census. The production of this report would have not been possible without all your support

I hope that this publication will be very useful in developing better and inclusive decisions and policies for the benefit of our people and our beloved country Kiribati.

Kam bati n rabwa

Dr Teuea Toatu

Hon. Vice President & Minister of Finance & Economic Development

Acknowledgments

I would like to thank everyone who have worked very hard despite the COVID19 and its impact, to help complete the Census 2020 and this Report. These had been tough times with their impacts on the socio-economic well-being of the world, in particular and more importantly, their impacts on the livelihood of the world's population.

The 2020 Population and Housing Census (PHC) is the 7th population census in Kiribati since the Census Commissioner leadership role was localized by Dr. Iete Rouatu, first Republic Statistician, who became the first local Census Commissioner in 1990.

I would like to sincerely thank all of the Development Partners, Organisations and the people participating in the Population and Housing Census succession, especially, the Government of Kiribati and its various departments, including the MFAT, for providing the additional funding when the COVID19 closed the borders and greatly impacted the budget. The Government also provided the bulk of the funding of the PHC 2020 and allowed for the transportation of the tablets to be used in the PHC by the Air Kiribati's Embraer from Australia during the difficult times of limited flight. UNPFA is acknowledged for providing Mr. Martin Bakker, the Technical Advisor who worked with the Census team at the beginning to produce table plans. Unfortunately, he had to leave due to COVID19.

Gratitude is also expressed to Mr. Epeli Waqavonovono, the Director SDD SPC, and his team for setting up the new server in time for enumeration. Other SPC SDD team members, including Michael Sharp (SPC Team Leader for Census and Survey Technical Support), Scott Pontifex (Microdata Curator and Dissemination Specialist), Luis De la Rúa (GIS Officer), Olivier Menaouer (Microdata officer), Stanislas Ozier (Web Developer – Dissemination & Survey Solution Server Administrator), Toga Raikoti (Census and Surveys Data Processing Specialist), Winston Faingaanuku (Census and Survey Data Processing Programmer) and Peter Bruechmann (Dashboard and Data Management System Consultant). Without the additional assistance by this highly-specialised team from SPC, the NSO, by itself, would not be able to do the CAPI process successfully.

I also thank the Supervisors and the enumerators of each island for their continuing hard work to collect Census data and for submitting them timely. My special appreciation also goes to all the heads of household and other adults who had dedicated their time to answering all the questions in the PHC questionnaire.

Last, but not least, special thanks go to the NSO team who on top of their tasks had assisted with the Census. Without their continuing effort we would not have succeeded in our first CAPI – PHC 2020. These include my two deputies, Ms Agnether Lemuelu and Ms. Orebwaa Morate. The former was an efficient Data Manager throughout the Census, who managed the data to flow back and forth until, all the data are brought in from all the islands, including the very remote like Kanton and those near at hand like North Tarawa. Ms Orebwa Morate and her team members Tebweaa Tamango and Elizabeth Copeland spent around 8 months away from their families to conduct the Census in the Line Islands. Teakin Sualau Tautebwa is specially commended for travelling a round trip on the Mauri, just to collect Kanton population within a limited time. Furthermore, Tikataake Tere-wa is commended for staying on Banaba for two months to train and lead the enumeration on the island.

The combined efforts and sacrifice of each and every one of the team members, had resulted in the successful completion and reporting of the PHC 2020.

Aritita Tekaieti
Census Commissioner 2020

Acronyms

CAPI – Computer Assisted Personal Interview
 CD—Children Dead
 CEB—Children Ever Born
 CS—Children Surviving
 DSA—Daily Subsistence Allowance
 EA—Enumeration Area
 FCD—Female Children Dead
 FCEB—Female Children Ever Born
 GIS—Geographic Information System (of mapping)
 GPS—Global Positioning System
 LFPR—Labour Force Participation Rates
 Linnix – Line and Phoenix Islands
 MCD—Male Children Dead
 MCEB—Male Children Ever Born
 MFAT—Ministry of Foreign Affairs and Trade (of New Zealand)
 NGO—Non Government Organisations
 NPI— Non Profit Institutions
 NSO – National Statistics Office
 PAPI— Paper Assisted Personal Interview
 PHC – Population and Housing Census
 SPC – Secretariat of the Pacific Community
 SDD – Statistics Development Division (Noumea)
 SOE—State-owned Enterprises
 TOT – Training of Trainers
 UNFPA— United Nations Funds for Population Activities

Kiribati words used

Mwaneaba—Meeting halls for villages, originally made of local materials found throughout Kiribati.

Population and Housing Census 2020

PRE-ENUMERATION

Introduction

The Population and Housing Census (PHC) is a major activity by the Kiribati National Statistics Office (NSO) carried out at every five years interval. This is the 7th Census activity since it was first administered by a local Census Commissioner. It was a *defacto* Census, meaning the counting of every person who resides in Kiribati on the Census night. The Census Night for PHC 2020 was the 7th November 2020.

Kiribati is divided into three main group of islands, namely the Gilbert Islands Group, the Line Islands Group and the Phoenix Group. Kiribati islands has also been distributed into five districts – Northern islands, Central Islands, Southern Islands, South Tarawa Island and the Line and Phoenix Islands (Linnix). The results in this report is presented mostly in the groupings of the islands; however some of them are presented by all islands, villages and a few are be presented by Urban¹ and Rural².

The Census Management

Preparation Stages

Preparatory activities began with the formalization of the Census Commissioner by a Census Order in accordance with the Census Act Cap 8, by the Attorney General's office and signed by the Minister and the Secretary to Cabinet.

A Steering Committee was set up to assist the Census Commissioner on the administration of the Census, and to provide guidance, when and where fitting for a smooth conduct of the Census, and provide other advice in accordance with its TOR.. At times there were ad-hoc members who were invited to attend special meetings. Most members and ad-hoc members come from relevant bodies to the Census activities. Meetings were held at the beginning of pre-enumeration activities, and continued after the enumeration for the post-enumeration activities.

Workplans initiated in 2019 which were finalized in 2020 for implementation after the Census Order was endorsed, then the Census Commissioner was appointed and finally, the budget was submitted to Government for approval.

In 2019, UNFPA provided the Technical Assistant, Mr. Martin Bakker, who had earlier assisted with the original workplan and table plan of the Population and Housing Census 2020, following an evaluation of the Census 2015. Working together with Mr. Bakker, the plan took shape with an original budget of \$1.6M (Annex 1- original budget). This was verified and justified according to the increase in population. It was an increase of \$0.4M, compared to the 2015 Census' budget of \$1.2M.

Many people and organizations have been involved in the plan-

ning and preparatory activities and during the actual Census enumeration phase. It was also the first in its series, to adopt the modernized tool of data collection using electronics CAPI. Coding and data entry used to be a significant part of the data processing prior to keying in the data but this had only applied to Occupations and Industries. The remaining were pre-coded and pre-entered during collection.

Below is the organizational chart for the Kiribati PHC 2020 (Figure 1):

Figure 1: Organizational Chart for Kiribati PHC 2020 Project

THE ORGANISATION STRUCTURE OF THE CENSUS

The PHC 2020 employed and engaged over 700 people. The bulk of this were the enumerators and the supervisors who totaled 685. The NSO had staff of around 14, divided into two groups—

six worked as 'Headquarters' and the rest worked in one way or another to validate data. An extra 13 Census team of validators worked, at the same time, to code the occupation and industries. An SPC SDD team worked on the maps, the editing, the data documentation and the analysis with one to two from the ICT team. A Senior Accountant from the Ministry of Finance and Economic Planning and an assistant accountant from the Census team formed the Finance Team. The seven members of the Steering Committee were also part of the PHC success. Two new Population Demography Program graduates joined the team to assist with the calculation of the analysis. All the contributions from the teams contributed significantly to the success of the PHC2020.

Methodology

Statistical Tools Used

1. Rural = all outer islands + Tabuaeran + Teraina + Kanton

2. Urban = South Tarawa + Betio + Kiritimati

In the previous Censuses, up until 2015, the data collection used paper form (PAPI) and the crosstabulation was done using CSPro ver 6. Data was keyed in manually after the collection in the office. The PHC 2020 was the first in the series of censuses to adopt modernized tool, a change of the cultural norms of data collection that enhanced the quality of data by adopting the Computer Assisted Personal Interview (CAPI) tool for data collection, keying the data during the collection and carrying out most of the editing on the field.

Analysis was performed using Stata /SE 15 and CSPro 6.6. The questionnaire was administered via Computer Assisted Personal Interview (CAPI) using Android tablets and Survey Solutions CAPI software. Because the server was in Noumea and the training was done locally, it only made sense that editing and finalization of data was done in SPC. This was a collaborative work by both SPC and NSO but the quality was also justified by SPC technical staff and demographer.

Documentation

PHC 2020 metadata, including a technical note, the questionnaire and the Data Documentation Initiative (DDI), are accessible here: <https://microdata.pacificdata.org/index.pho/catalog>.

Household Listing on South Tarawa

Alongside the preparation of the workplan and budget, the recruitment for the household listing team was done and the team started the listing on South Tarawa in March 2020. This was essential since it has more than half the population of Kiribati. During this activity, there was a Measles breakout in Samoa and the public was advised to take precautions. Visiting the households became a challenge giving a delay to the team in carrying out its work. This led the immunization of all the team members, including the officers at NSO since they were vulnerable. Not long afterwards, another wave of announcements about COVID19 (a deadly virus) were made by the media. That increase panic to the people who did not know what to do. This time all activities were on-hold including the Census, awaiting confirmation of the stage of alert by the President's Office. Fortunately, Kiribati was at level 1 which meant that the country was virus free and so the work resumed, although international flights ceased.

Questionnaire

Translation Activity

In the months April and May 2020, the preparation activities continued to prepare the questionnaire prior to the Census. Kiribati also adopted the model questionnaire from the region provided from SPC as proposed by the HOPS meeting 2019. The questionnaire was contextualized inserting some national questions, translated and back translated by the local consultants. Previously it was not possible to translate as in the end it would be a choice of English Questionnaire paper or Kiribati language question paper, however with CAPI, the questions on the tablet were made available in both English and Kiribati versions to assist the clarification on the questionnaires for the interviewers, respondents and the other field workers.

Questionnaire Design Activity

The process on how NSO carried out the questionnaire design includes the contribution from the stakeholders. Not all contributions from the stakeholders could be taken in the Census' final questionnaire, however there were critical ones that were included. The stakeholders consisted of representative from the ministries, SOEs, NGOs or NPIs. Meetings were convened with stake-

holders at NSO going through each original questions in the questionnaire. These meeting involved few stakeholders taking turns, ranging from 1 to 5 persons at each meeting, depending on the amount of input they had. The Environment Conservation Division was given a separate session since all members of the division wanted to participate in the meeting.

In the meetings, the sectors, NGOs and other organizations presented their few questions to be included in the Census. The questions given priority however, were those that target the KV20 indicators or deal with issues related to the environment health, WASH and related Policies.

Finalizing the Questionnaire Activity

The final stage of the questionnaire design was the preliminary testing on the field. This stage is known as the Pilot testing of the questionnaire. A team of 45 persons were recruited to carry out this activity supervised by the NSO Staff team. This team tested the questionnaires with households on Abaiang, North Tarawa and Bairiki, South Tarawa. From the notes captured from the fieldwork, most of the respondents considered the questionnaire too long. Some of the questions were changed from the person question to the household question due to the difficulties in getting correct responses. CAPI signals for synchronizing everyday data was tested with good results. The approach to the respondents was tested and was encouraged by the respondents to have more awareness prior to visiting the households. In the end the questionnaire was finalized and sent to the programmer at SPC to embed in the software known as the Survey Solutions.

Map Demarcation

Map demarcation and EA boundary delineation were also activities carried out prior to the test the questionnaire; again during the enumeration when GPS were recorded within those boundaries. Household listing done in those exercises, helps monitoring in cases of household being skipped or GPS recorded out of bounds and ensure counting dots to map the listing previously done. For that households GPS recorded when out of bounds display different color and need to be corrected on the spot.

Modernizing Data Capturing and Data Management

During the planning, the UNFPA Technical Assistant was informed that as part of modernizing Data collection of improvement of data quality, Kiribati PHC will adopt the new tool CAPI. The TA reported challenges and shortfalls of using CAPI experienced from other neighboring countries that Kiribati could learn from. Learning from these lessons had assisted the NSO to carefully formulate the instructions both technically and logically to carry out this 2020 PHC. Accordingly, the plan incorporated the change in roles and responsibilities to accommodate the CAPI version of data collection. That included purchasing enough tablets (700), creating positions such as data managers and assistant data managers for the Line islands, data validators from the NSO office and the "headquarters", meaning, the last people to validate the data for the third time in a row, and the server to host the data capturing during the synchronization of everyday data. Three levels of monitoring took place i.e., Supervisors on the field, data validators³ in the NSO office, 'Headquarters' from NSO office and monitors from the Server at Headquarter both in NSO and at SPC to monitor using the Dashboard of Survey Solutions. The Dashboard could be seen, simultaneously, by the NSO in Kiribati and by SPC during the days of the enumeration.

From the designing of the questionnaire into the CAPI system made ready for data capturing.

At the bottom is the 3 "interviewers" to 1 "supervisor", then we

create an extra level to validate the data from the “Validators” prior to having the “Headquarters” who will finalize the data validation.

CAPI Adoption for Census - Challenges of COVID19.

Although CAPI for PHC was used for the first time, from NSO point of view, this was the third time, in the row, to adopt CAPI for data collection and therefore no new issues were expected during the data collection. The pros and cons of adopting tablets were considered and in the end the final approach for this Kiribati 2020 Population & Housing Census will use CAPI, as this had been definitely tested for data quality. The expense although will be more on the tablets however it will be less in recruiting data entry officers. There will be less work on the data validation, data verification once it is off the field.

CAPI Workplan for Training delivery.

As part of the planning there are quite a few changes to incorporate from adopting the CAPI instead of the PAPI. A change in supervisor numbers for each island and each field as well as the enumerators supervised. The ratio is to 1:3 unless in very small populated areas there could be 1:4 - controllable size for quick on the spot checking, and validating. How the training was to be delivered was changed from getting the outer island supervisors for training on South Tarawa to sending the trained Census officers to outer islands. Decision was made for the 2nd option due to the limitations from the unforeseen COVID-19, such as Air Kiribati's operation of only one plane to outer island.

Options 1 was to get the outer island supervisors to South Tarawa trained to deliver to outer islands upon return. (This used to be the norm for the other previous Censuses).

Option 2 was to carry out training of trainers (TOT) who would then deliver to the outer island. These trainers would be delivering and joining the enumeration and carry out data validation and checking while on the island during the enumeration period, and bring the tablets back at the end of work.

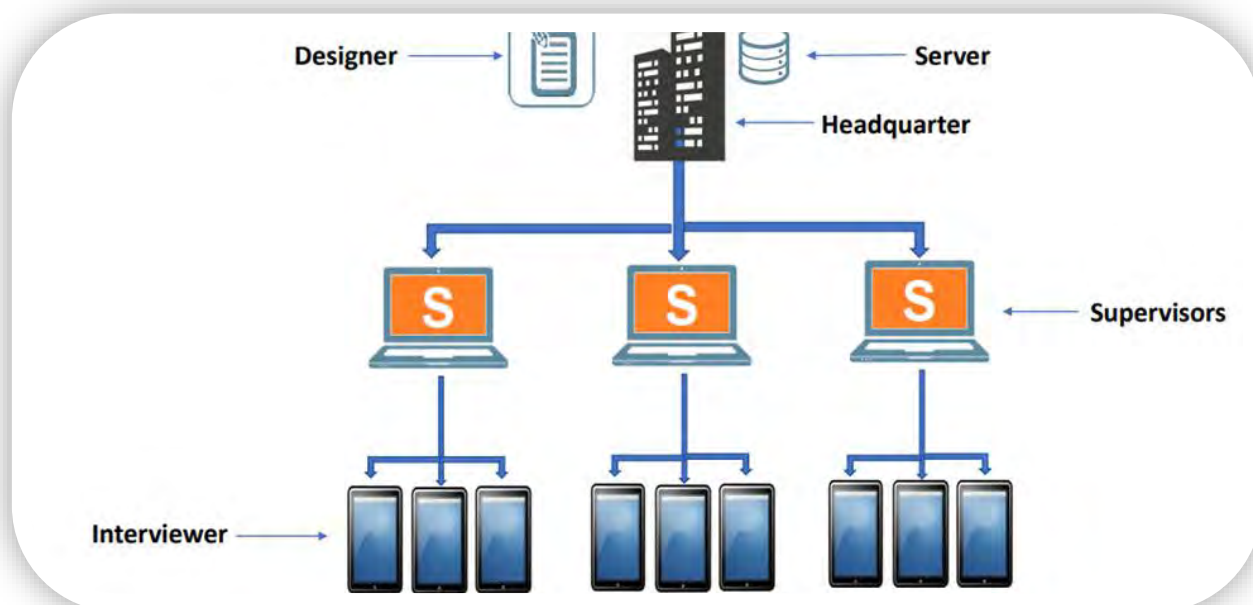

The 1st option was what had been done over the years in the past PHC for the last censuses; however the 2nd option was the best option, considering the limited skills on CAPI for the outer is-

lands, that created a level of trainers which were mobilized to outer island. The successful 13 out of 45 persons from the demarcation and pilot team were reduced by a test, and were trained as trainers for the option 2 plan. The training also included modules to train participants to be data validators after the enumeration to assist to validate the data coming in daily from the field. A five weeks' training with six tests (Appendix 2: results 1) was carried out to ensure quality trainers.

The 13 trainers, fully equipped in all the activities of the Census; had full understanding and ability to master the questionnaire; able to deliver the training to the outer island teams; supervise the household listing for the islands and upon return to Tarawa, able to validate, were deployed to the outer island. It was planned to send them around three weeks prior to the actual Enumeration; however with the limitation of the flights, seats were reserved for the trainer to travel earlier as available seat were hard to get, given that only one plane was serving all the islands. This had increased more cost with regards to DSA but was a good choice since if Option 1 was chosen, it would have been difficult to transport all the supervisors back to their respected islands in time for the training of the Island enumerators. All the training were carried out at one time, on the outer islands, for the enumerators and supervisors on how to use CAPI, understand the questionnaire, list the household prior to the Census, allocated with the EA (Enumeration Area) and know the EA boundaries as to avoid duplication and double counting. South Tarawa on the other hand had a little bit of deviation in their training program as the listing was done prior to the training. The team on South Tarawa were trained on the questionnaire, CAPI, allocated to each supervisor and given EA and made to know their EA boundaries. Electronic Maps were used by all the supervisors and enumerators for control of work imbedded on the tablets. Each enumerator had an EA map and a supervisor map to understand where the allocated areas was in which she or he was allocated.

CAPI – Supervisor's training

Supervisors had the same training for all the questions in the questionnaire, since all of them were trained at the beginning then tested at the end of the training with marks showing that the top ones would become supervisors. Then the supervisors had to

undergo the training once more a week prior to the enumeration making it done twice for better understanding for the enumerators. There was a special training for the supervisors on how to check the data, view the GPS points to ensure all the households are counted listed **and new ones**. They were also taught how to synchronize back the ones with errors for immediate correction and to ensure field works were smoothly carried out.

CAPI Training and challenges on South Tarawa

In July, 2020, recruitment of all the enumerators and supervisors were done, a screening test of around 700 interested persons turned up for the test and only 341 successful candidates were selected. A group of almost 40 candidates were grouped into 9 groups and separately trained on all modules in all of August and the beginning of September. At the end of the first training, all the candidates were tested and scored to identify the best of the best to be supervisors, who has to master the questionnaire and all its contents. On South Tarawa, the supervisors and enumerators were allocated Enumeration Area (EA) and had their EA boundaries allocated and assigned. There were 243 EAs which meant that 243 Enumerators were required, assigned to 81 supervisors – a team of 1 supervisor to 3 enumerators (Plan attached). For the institutions there were 35 enumerators for institutions and each was assigned with an enumerator. These institutions included Hospitals, boarding schools, prisons, *Maneabas* used by MOH to accommodate patients waiting for transfer to outer island etc. All these enumeration and supervision carried out their works using bus tickets. All the enumerators were issued meal allowances on the field, transport allowance or bus tickets.

The COVID19 mostly affected the transport sector in Kiribati. The flights for outer island used a single plane due to the unavailability of the spare parts. This led to changes such as mobilizing the outer island trainers to travel earlier than planned, in September instead of October or November. This had increased the cost of the per diems, however it had delivered the skills and got outer island enumerators and supervisors recruited and trained, and maps of allocated Enumeration Areas (EA) assigned to enumerators and enumerators assigned to each supervisor. These trips although rescheduled and delayed, both going to and coming back from the outer islands, were successful eventually.

The other major issue was the Server to host the data. This was the contribution of SPC with UNFPA support. The server was picked up from the former host and housed in the SPC office in New Caledonia. With the great effort of SPC team, the server was up and running prior to the Census Night. With the new server operating well, work had been a tremendously success. This was where the data were displayed daily and the summary results of everyday work, monitored and evaluated. It was the storage venue to house all data collected during the PHC.

Challenges encountered

Training and Enumeration in the Isolated Islands - effects of Covid19

Kiritimati training was not different from the rest of the other islands although due to the cancellation of flights to Kiritimati via Fiji, a special team of three consisting of the Deputy Census Commissioner, a data processor and a supervisor, travelled in May 2020 **by ship**, and returned in early January 2021. The team had to demarcate Kiritimati, recruit the supervisors and enumerators, train them and then repeat the process for Tabuaeran (Fanning island) and Teraina (Washington Island).

Banaba training was done in the same way as the other outer is-

lands however the trainer had to travel by ship at an earlier date and stayed on the island to train the enumerators and supervisor and assist in supervising during the Census. The Supervisor finally returned to Tarawa in December, 2020.

Kanton Island is one of the most isolated islands of all in the Phoenix Group. There was a total of 8 islands in the Group and only one, Kanton, is inhabited. A total of 43 were people living on the island and for that NSO had to reach the island to enumerate them. A private ship travelling to Kiritimati, was diverted to Kanton carrying one Supervisor to carry out enumeration there. The ship was the first and last ship to travel prior to the Census night and therefore the Census Commissioner declared the enumeration before the 7th November as valid for Kanton.

Connectivity

Two of the islands in the Central Kiribati, Kuria and Aranuka had with very slow bandwidth and as a result internet connection was limited. The data was collected using CAPI, however, the synchronizing was done at a later date on South Tarawa upon the return of the tablets. For these reasons all the data was done offline and manually by the supervisors on the field on the respected islands. Although connection is challenging, the data collection on CAPI was always of improved quality since it is pre-installed with **logics**.

Social Events

On Maiana one of the islands in the Central Kiribati, an ordination of a young priest was celebrated - a big event to which guests from almost all of the islands had been invited. The event took place during the enumeration period so there was a need to recruit four more workers and to train them to enumerate the visitors living in institutions (Maneaba).

Working Remotely

At first there was the problem of hosting the server for survey solutions, the program to be used for CAPI. Due to the COVID19 and sensitivity of the data, the server needed a new host. SPC was grateful with their talented team to take on board the server to be hosted in Noumea. Kiribati team worked with faith to carry out the preparation activities while SPC team were setting up the server for the first time. This was used as a capturing system that would host the Kiribati Population Census. The Server was ready in time prior to the round of enumeration.

The whole preparation was successful due to the great effort of SPC and NSO teams working together in the new remote environment. All means of communications were used including Facebook Messengers between these two partners. Things went as planned, including exchanges of emails, translations being passed back and forth, validation of questions, requests for logics for verification and more. Encouragements between partners were part of everyday work for both SPC and KNSO.

Funding

Most of the funding for the PHC 2020 came from the Government of Kiribati. Some of the fund received from the assistance of MFAT due to the Covid19. The total amount spent for the PHC2020 for 2020 was \$1.9M, inclusive of the re-plan costing to meet the challenges of transportation due to COVID19. The 2020 the Census had an overspent of \$700,000, due to unforeseen and unavoidable circumstances, of which \$500,000 was met by MFAT. The following year in 2021 an additional budget of \$410,000 was provided to complete the analysis. At the end of the work the whole PHC 2020 expenses totaled **not** over \$2M.

Reasons for boosting the Costs.

Throughout the preparation stage, there was an effect of COVID19 which boosted the cost upwards:

The plan to mobilize a team of three to Kiritimati was implemented in May 2020, that set up a mini Census office to enable the work and ensure it was consistent, despite the challenges.

The single plane servicing the islands, created unrealistic timeframes where plans had to include sufficient time and allow for delays in flights, thus causing more costs.

The trainers who could not return from the outer islands due to the unavailability of transportation service. For example, an officer has to travel earlier to Banaba in October and stayed on the island until the enumeration.

A large portion of the expense was for salary of all the workers in the Census enumeration, such as the supervisors, the enumerators, the office staff, accountants, assistant data managers, logistics officers, liaison officers and others.

Despite all the challenges and increase in cost, the Census team was ready and in place to implement the work so the efforts were not wasted as the enumeration were able to go on the 7th November 2020.

ENUMERATION

Plans and tools for Enumeration

Fortunately, all the plans were set for the enumeration, on time. Enumerators were trained, tablets reached the islands prior to the enumeration with the exception of Arorae where the tablets arrived four days late. With all the reference period of the 7th November, 2020, the enumeration was carried out smoothly and for a period of three weeks. Every day from day 1 all the data collected were synchronized to the server, where all could be viewed, validated and synchronized back for editing on the spot at the headquarters both at SPC and NSO

It was a shared task, since CAPI made everyone work on the data simultaneously with the data checking and validating. The data validators were tasked to interrogate the data of their respected islands that they were assigned to. The Kiritimati data was treated the same with the data validator working with them on the island.

The preliminary figures of the Census were obtained on the 30th December 2020 and was published on the website on the 22nd December 2020. This indicated that at the end of the data capturing the preliminary figures were available straight away, raw uncleaned, but overall indicated the close to accurate number of the Population at the end of the field work.

POST ENUMERATION

Data Finalisation

After the data compilation was completed, the editing work was carried out. Data cleaning was done by SPC, as a combined effort with NSO, since the training using CAPI and the training of enumerators and supervisors, were done in country by locals together with data collection and data management, due to the Covid19 that ceased all the travels in and out of the country for the TA. Quality assurance is the main objective in the cleaning of data and was completed and finalized as a public dataset on April 6th 2021.

THE SUMMARY OF THE MAIN RESULT

Table G-1: History Table for Kiribati Population by island for Census year 1947 to 2020

	Census Total Population												
Island/ region	1947	1963	1968	1973	1978	1985	1990	1995	2000	2005	2010	2015	2020

ANNEX 1: LINE ISLANDS REPORT

Date	Activities progress																												
24/05/20	LC Linnix arrived in Canton and arranged with the PIPA Coordinator the transport to carry out the listing on the island even though we did not have a permit to visit the village. The internet connection on the island was very poor so we were using the paper for our household listing records and then typed them in excel for data storage and backups. Lisa tried to synchronize but unsuccessful as the internet connection unstable. The number of households was 8 with a total number of 54 people																												
25/05/20	Around 0600 to 0700am the ship departed Kanton																												
01/06/20	It was in the morning where the team arriving in Xmas island. We took a half daybreak, then had a meeting with the Linnix Secretary and requested if they could provide a room for the Census team within the Linnix building. Unfortunately, there was no available room, so the Secretary informed us to seek assistance from MOE if they have any available room. At the same time, the team also have time to contact Toga regarding the expiry date of the survey solution otherwise the questionnaire might not available online.																												
02/06/20	Releasing census materials from KSSL storage.																												
03/06/20	Director of Planning offered a room to be utilized by the Census team.																												
04/06/20	The Census Commissioner from headquarter recommends previous Census Supervisors (Teereta Bineati (Poland), Kateia Enoka (Banana), Butikong Teataua (Main Camp), Tongaio Kaitu (Tabwakea) and latinta Kianteroro (London)) to be part of the Census team for their previous experienced and familiarity with tablets in the past 2018 HIES surveys. Beia recruited as the Census driver.																												
05/06/20	Have a training with five former census team on how to operate tablets and signing the contract for the Upcoming Census activities.																												
06/06/20	Starting date of Kiritimati household listing with these five census household listing officers																												
12/06/20	Supervising the test for recruiting eight more household listing officers. Below are the names of the top eight applicants: Iatirite Bitam (Banana), Tawana Bitam Tetoa (Banana), Biriiaam Riinga (Tabwakea), Takeua Tetaake (London), Ioakina Riwata (Banana), Totene Oriwe (Tabwakea), Timon Kiraren (Tabwakea), Teuota Karikate (Tabwakea).																												
15/06/20	Training started on Census Questionnaire modules with eight new Census officers and signing the contract.																												
17/06/20	Practical started with using tablets																												
19/06/20	Census questionnaire training continued including the distribution of Enumeration Area maps and assigning all household listing officers to respective EA numbers.																												
22/06/20	Pilot census started with 12 enumerators at Ronton, Tabwakea, Banana and Poland. Each enumerator was assigned to work with 2 EAs within 3 to 4 days. The first 3 days of pilot testing was carried out in Ronton, Tabwakea and Banaba and then the other 2 days in Poland																												
25/06/20	The pilot census targeted the EAs which have more than 60 households																												
29/06/20	From our observation in the pilot testing, the team proposed to the headquarter the splitting in some EAs were more than 60 households																												
BREAK - KIRIBATI INDEPENDENCE CELEBRATION																													
11/08/20	Three tickets purchased for hosting Census training in Tabuaeran and Teraina. Booking for Tabuaeran – 17 th Sept 2020 (Elizabeth Copeland and 1 supervisor). Booking for Teraina – 15 th Sept 2020 (Tebwea Tamango)																												
12/08/20	Rearranging the splitting of EAs as advised by Census Commissioner and to informed Toga and Luis. The proposed EAs split are as follows; <table border="1"><thead><tr><th colspan="4">2020 HH Listing</th></tr><tr><th>EA #</th><th>HH #</th><th>split into</th><th>size of EA</th></tr></thead><tbody><tr><td>22010013</td><td>65</td><td>2</td><td>33 & 32</td></tr><tr><td>22020023</td><td>103</td><td>2</td><td>52 & 51</td></tr><tr><td>22020024</td><td>92</td><td>2</td><td>46 & 46</td></tr><tr><td>22020025</td><td>142</td><td>3</td><td>47, 47 & 48</td></tr><tr><td>22020026</td><td>175</td><td>3</td><td>58, 58, & 59</td></tr></tbody></table> The Census Team seek assistance from Teraina & Tabuaeran Clerks for Census enumerators recruitment	2020 HH Listing				EA #	HH #	split into	size of EA	22010013	65	2	33 & 32	22020023	103	2	52 & 51	22020024	92	2	46 & 46	22020025	142	3	47, 47 & 48	22020026	175	3	58, 58, & 59

22020026	175	3	58, 58, & 59																										
24/08/20	Census Questionnaire training started again, and the discussion was more focused on Economic Activity which seemed a tough module in enumerators perspective.																												
26/08/20	Enumerators practiced on CAPI																												
31/08/20	Supervisors tasked to do a presentation on the Census Questionnaires and the first outstanding performance will assigned to be the Census supervisor in Tabuaeran. Ioakina Riwata was fortunately having a top score and then automatically became the census supervisor for Tabuaeran island.																												
02/09/20	Received an information from Air Kiribati about cancellation of future flight that might affect our previous booking, so we changed the date of booking at the earliest on the 3 rd Sept 2020 for Teraina and Tabuaeran.																												
03/09/20	Tebwea Tamango departed to Teraina while Ioakina Riwata to Tabuaeran.																												
07/09/20	About the need of recruiting more enumerators, we were gone through the previous test results and selected the top 31 and signed them to join the census team.																												
08/09/20	Census questionnaire trainings started and then found out that the number of participants were too much in comparison to the size of the training Centre. Participants divided into two groups. The first group was assigned to attend the morning session while the second group in the afternoon session. The training spent 7 days on Census questionnaires and CAPI up to 16/09/20																												
16/09/20	Secretary MLPID agreed to assign one of the Accountant from the Account division to assist 2020 census team on financial issues. Moata Aukitino signed contract.																												
17/09/20	Elizabeth Copeland departed for Tabuaeran island for conducting the workshop on census questionnaire and CAPI training																												
19/09/20	10 Supervisors refresh training on Census questionnaires for 2 weeks. The purpose of this training to prepare themselves before delivering presentations to enumerators before the census enumeration.																												
16/10/21	Recruitment of 31 census enumerators. These are the name as follows; Enumerators: Tiibau Tekoti, Tauateiti Tutokorau, Teribauea Bwaroko, Raamram Tautebua, Butikong Teataua, Kaaro Buiona, Iebwebwe Toaia, Tureti Rateti, Gertrude Lefulefu, Maitite Kabiri, Rabana Tauta, Teirabung Neemia, Bikata Atuata, Abitea Tawita, Eren Kiraren, Ntiei Barai, Aniti Morei, Henty Arobati, Lavender Angimarau, Tememue Teuribaba, Teita Otieru, Teuebung Tabwai, Tabwentoa Kabaea, Mareta Itaita, Bereta Tointarawa, Beeta Baibuke, Rotintaake Botibara, Keiti Kamaua, Kaota Biita, latinta Kianteroro, Bakaa Tetaua Supervisors: Teereta Bineati, Tawaana Bitam, Kateia Enoka, Iatirite Bitam, Biriiaam Riinga, Totene Oriwe, Teuota Karikate, Tongaio Kaitu, Timon Kiraren, Takeua Tetaake																												
23/10/20	Enumeration Area boundaries checked with supervisors from London to Banana																												
06/11/20	Census Accountant worked on all claims from those involved with the census activities																												
ACTUAL FIELD WORK – CENSUS NIGHT (07/11/20)																													
07/11/20	Census enumeration continued for more than 2 weeks																												
27/11/20	Supervisors and enumerators recall for incomplete questions																												
30/11/20	Paid all outstanding claims for Teraina and Tabuaeran including Kiritimati island.																												
10/12/21	Tebwea Tamango and Ioakina Riwata returned on MV LC Aratobwa from Teraina and Tabuaeran.																												
04/01/21	Departure date to Tarawa																												

TERAINA CENSUS REPORT 2020

03/09/20	Tebwea Tamango arrived in Teraina. Have briefing with the island clerk and then request for census recruitment. The clerk conveyed messages through her councilors in different villages about the test that will commence the next day.
04/09/20	There were 40 candidates attending the test. The papers were marked by the census supervisor Tebwea Tamango and then confirmed the result with the clerk as follows. 1. Teubati Taorobwa 2. Maomao Temango 3. Betita Riata 4. Tokaia Temeeti 5. Lamisi Katarake 6. Celine Ingatia 7. Teera Ritiata 8. Ureta Rakunene 9. Tiobia Koito 10. Arinata Nabakai 11. Tabaina Taukabwan
05/09/20	The census team have a brief meeting for the next day training. The \$10 meal allowances and \$5 for fuel cost was given to enumerators
07/09/20	Census questionnaire with CAPI training started and then finished on the second week. The team members study hard on all the 9 Enumeration Areas. The census supervisor Tebwea Tamango gives the \$5 for the fuel cost which is much reasonable compared to \$80 for the truck hire a day.
18/09/20	The test commenced for the selection of the census supervisor. The 2 top scores of the test was Teubati Taorobwa and Maomao Temango
21/09/20	Enumerators and supervisors went out to the field to study all the boundaries before the household listing
22/09/20	Household listing started using PAPI with a payment of \$10 for meal allowances.
23/09-25/09	Census questionnaire training continued with supervisors and enumerators
BREAK TIME	
19/10/20	Supervisors have a refresh training on the census questionnaires including the survey solution to study thoroughly before checking household in 2 weeks
20/10/20	Supervisors received a \$5 for the fuel cost without a meal allowances as they already signed a contract for salary
02/11/20	Supervisors and interviewers combined training and practiced on using CAPI before the actual field work (7 th Nov 2020) for a week including the proper study of their EAs.
03/11/20	The clerk contacts us about the DW which was not covered all supervisors and enumerators salary. One of the MFED Senior Accountant Tutu advised to use transportation budget to pay for the census team salary.
ACTUAL FIELD WORK – 7TH NOVEMBER 2020	
04/11-20/11	The census team managed to complete data collection as well as census supervisors in checking of household. Warm appreciation to the clerk for her great support and allow the census team to work in their office which contribute a lot to the completion of task on timely basis. Clerk also allowed the census team to overnight in the office for the use of stable internet connection with a fee of \$5 per hour
27/11/20	The census accountant Moata Aukitino assists to pay the remaining salary of the supervisors and interviewers including other expenses during the census enumeration. The interviewers ceased the census appointment whereas the supervisors continuously paid for the checking of the completion households.
05/12/20	Closing event of the CENSU ENUMERATION 2020
26/12/20	Departure date to Kiritimati Island on MV LC Aratobwa

APPENDIX A — VALIDATION CONDITIONS AND MESSAGES

[1] `month_dob`: P3b. What is ` %rosteritle%'s MONTH` of birth?

Validation Condition:

```
(self.InList(1,3,5,7,8,10,12) && day_dob.InRange(1,31)) ||  
(self.InList(4,6,9,11) && day_dob.InRange(1,30)) ||  
(self==2 && day_dob.InRange(1,29)) ||  
(self==99 && (day_dob.InRange(1,31) || day_dob==99)) ||  
(day_dob==99 && self.InList(1,2,3,4,5,6,7,8,9,10,11,12,99))
```

Validation Message: Day is inconsistent with month ...please check !!!

[2] `age`: P3d. What is ` %rosteritle%'s age`, in completed years?

Validation Condition:

```
self.InRange(0,110)
```

Validation Message: Age must be between 0 and 110

Validation Condition:

```
((self == 2020 - year_dob) &&  
(year_dob<=2019 && month_dob.InRange(1,10)) ||  
(year_dob<=2019 && month_dob==11 && day_dob<=7)) ||  
(year_dob==2020)) ||  
  
((self == 2020 - year_dob - 1) &&  
(year_dob<=2019 && month_dob==12) ||  
(year_dob<=2019 && month_dob==11 && day_dob>7))) ||  
  
(age == 2020 - year_dob) && (day_dob==99 || month_dob==99))
```

Validation Message: Age (day, month and year of birth) is inconsistent to the Census Night date - November 7th, 2020

[3] `level_attending`: D6. At this level, which grade is `%rosteritle%` attending during the current school year?

Validation Condition:

```
!(self.InRange(1,3) && (age < 3 || age > 5))
```

Validation Message: This person is `%age%` years old and is inconsistent with Pre-school age, which should be between 3-5. Change either the age or level of schooling

Validation Condition:

```
!(self == 11 && (age < 5 || age > 7)) &&  
!(self == 12 && (age < 6 || age > 8)) &&  
!(self == 13 && (age < 7 || age > 9)) &&  
!(self == 14 && (age < 8 || age > 10)) &&  
!(self == 15 && (age < 9 || age > 11)) &&  
!(self == 16 && (age < 10 || age > 12))
```

Validation Message: This person is `%age%` years old and is inconsistent with this Primary Level. Change either the age or level of schooling

Validation Condition:

```
!(self == 21 && (age < 11 || age > 13)) &&  
!(self == 22 && (age < 12 || age > 14)) &&  
!(self == 23 && (age < 13 || age > 15)) &&  
!(self == 24 && (age < 14 || age > 16)) &&  
!(self == 25 && (age < 15 || age > 17)) &&  
!(self == 26 && (age < 16 || age > 18)) &&  
!(self == 27 && (age < 17 || age > 22))
```

Validation Message: This person is `%age%` years old and is inconsistent with this secondary school level. Please confirm !!

Validation Condition:

```
!(self < grade_completed)
```

Validation Message: Current level `%current_level%` cannot be lower than level completed `%grade_completed%`

Validation Condition:

```
!(self.InRange(31,33) && (age < 16))
```

Validation Message: This person is `%age%` years old and is inconsistent with this vocational level. Please confirm !!

Validation Condition:

```
!(self == 41 && (age < 18)) &&  
!(self == 42 && (age < 18)) &&  
!(self == 43 && (age < 19)) &&  
!(self == 44 && (age < 21)) &&  
!(self == 45 && (age < 25))
```

Validation Message: This person is `%age%` years old and is inconsistent with this tertiary level. Please confirm !!

APPENDIX B — INSTRUCTIONS

[1] **occupancy: IF1. What is the occupancy status of the dwelling?**

For option 2 & 3, you will need to revisit the dwelling for 2-3 times to confirm if there is no appropriate respondent or they refused to be interviewed. You may need your Supervisor to assist you on this. Likewise for vacant households, you may have to revisit to confirm if occupants are away for a long time.

[2] **member_list: P1. Please list the FULL NAMES of all persons living in this household/institution during Census Night?**

Please give me the full names (first name then surname) of each person who was sleeping here the night of 7th November 2020, including visitors and all persons staying here who have no other home. Do not include persons who usually reside here, but were staying elsewhere in Kiribati on Census night as they will be counted at that location. NOTE: The first person listed should be the Household Head : The Head or acting head is the person with primary authority and responsibility for HH affairs and is, in the majority of cases, its chief economic support. IMPORTANT: If two people have the same first name, add a middle initial

[3] **age: P3d. What is %rostartitle%'s age, in completed years?**

Age in completed years. Enter 0 for child under 1 year of age. Age range is 0-110. Note that there is a check on the age against the Census Night date - November 7th, 2020. Anyone born after 7th November in a particular year will have 1 less year of age. eg, date of birth 18Dec2000 will have age 16, whereas, date of birth 18March2000 will have age 17. For Missing day (99) or missing month (99), age is calculated by year (2020 minus year of birth)

[4] **lf7: E7. What is the main activity of the place where %rostartitle% work?**

Write the main activity of the establishment and main products or services provided –eg. [Police Department –public safety; Restaurant – preparing and serving meals; Transport company –long distance transport of goods]

[5] **crop_purpose: FC2. What is the purpose of growing the food crops?**

Customary practices includes preserve of traditional knowledge and skills of planting and cultivation, preserve of traditional plants and crops for food in different festive events, provide raw materials for local medicine, local buildings/ local architectural arts, craftsmanship and handicrafts)

[6] **livestock_purpose: LS2. What is the purpose of raising livestock?**

Customary practices includes preserve of traditional knowledge and skills of planting and cultivation, preserve of traditional plants and crops for food in different festive events, provide raw materials for local medicine, local buildings/ local architectural arts, craftsmanship and handicrafts)

[7] **buildingGPS: 13a. Please record the location of this household or institution. FOLLOW THE RULES BELOW:**

General rules: 1. GPS cannot be taken inside a building. 2. When you turn the GPS/location mode on wait at least 1 minute before trying to take a location. You will get a validation error if the accuracy is not better than 30m. Stand on the same spot and press the GPS button again. 3. Stand at least 30m away from the wall of a building 4. Make sure you can see the sky 5. Don't stand under a tree unless there is no other option You will need to try at least a few times to capture the points.

[8] **photo: 13b. Please take a photo of the front of the dwelling. FOLLOW THE RULES BELOW:**

Take photo of the front of the dwelling: 1. House - take FULLVIEW of the front of the house, make sure entrance/door can be seen 2. Apartments - take entrance to apartment block. One photo must be taken for EVERY apartment in the block. 3. Prison - take the front/entrance. 4. Hotel/Motel - take the front/entrance.

ANNEX 2: NAMES OF CENSUS TEAM FOR 2020

Names of NSO staff working on Census

1	Aritita Tekaieti
2	Agnether Lemuelu
3	Orebwa Morate
4	Michael Maruia
5	Tiriara Ikam Moaniba
6	Aoniba Francis
7	Taotirita Kauongo
8	Anataake Maurintekeraoi
9	Kanikua Tekaoi
10	Niibo Iaruru
11	Kitanna Kiritian
12	Aariera Kouraata

Names of NSO Census Office Working

1	Elizabeth Copeland
2	Teribwata Tenanoa
3	Roiti Betero
4	Katarina Ianikarawa
5	Makurete Karebwa
6	Taobwe Tasie

TRAINERS & DATA VALIDATORS

1. Rewi Tamango
2. Tikataake Terewa
3. Bwe Temakei
4. Tarabeia Teibaba
5. Tireta Mweroa
6. Kabwebwe Raiwan
7. Vika Tokaa
8. Colleen Atiera
9. Tietiita Eritara
10. Rinan Tekarimwi
11. Tiita Tioti
12. Reni Tekaieti
13. Taneta Kaitara
