

### **Capacity Assessment**

# Assess NSO resources

### What is the **optimal** mix... to fully deliver your NSDS?

# of staff 10

(4 male, 6 female)

**staff expertise** 0 = degrees in statistics

4 = dips or certs in statistics

4 = other qualifications

(eg degrees in economics, business studies, management,

psychology, public health)

**staff experience** 18 years

(staff average - years in the statistics sector)

financial resourcing 0.2%

(NSO budget / Total Country Budget)

### **NSO Capacity Continuum....**

... in the context of fully delivering your NSDS

	Emerging (Initiating)	Functional (Sub-optimal)	Well-established (Optimal)
# of staff	< 50%	50%-80%	> 80%
Expertise	< 60% stats qualified	60-80% stats qualified	> 80% stats qualified
Experience	< 5 years	5-10 years	> 10 years
Financials	< 0.2%	0.2% - 0.5%	> 0.5%

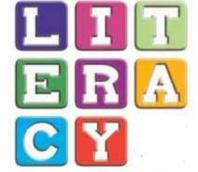

## Use a Statistical Capability Framework

(for example ABS)

### Capability Framework Components...

	Component Description		
Leadership	<ul> <li>Enhances the NSS</li> <li>Works in Policy and Legislative environment</li> <li>In the 'business of statistics'</li> </ul>		
Production	<ul> <li>Stakeholder engagement skills</li> <li>Research skills</li> <li>Collection design skills</li> <li>Data transformation skills</li> <li>Analytical skills</li> <li>Data quality management skills</li> </ul>		
Literacy	<ul> <li>Data awareness</li> <li>Understanding statistical concepts</li> <li>Analyse, interpret &amp; evaluate statistical information</li> <li>Communicate statistical information and understanding</li> </ul>		

### NSO Capacity Continuum....

... in the context of fully delivering your NSDS

	Emerging (Initiating??)	Functional (Sub-optimal)	Well-established (Optimal)
Leadership	No or partial compliance with skills within the framework	Fully complies with some but not all skills within the framework	Fully complies with all skills within the framework
Production	No or partial compliance with skills within the framework	Fully complies with some but not all skills within the framework	Fully complies with all skills within the framework
Literacy	No or partial compliance with skills within the framework	Fully complies with some but not all skills within the framework	Fully complies with all skills within the framework

### My thoughts...

Find a way to assess [capacity / capability / skills] in a way that focusses on organisational improvement, set against an ideal state – and monitor progress using a capacity continuum

#### then...

Aim Technical Assistance (and donor funding) at building organisational skills as per gaps in the continuum – rather than supplementing or attaching individuals to deliver statistical events.
