Foreword

The Statistics for Development Division (SDD) of the Secretariat of the Pacific Community (SPC) is providing technical assistance in statistics to 21¹ Pacific Island member countries and territories with the aim of:

- building capacity to sustain ongoing statistical operations, and
- strengthening compilation of statistics using the latest appropriate best practice.

One of the key strategic components of the Pacific Statistics Strategy Action Plan Phase 1 (2011–2014), Phase I of the Ten Year Pacific Statistics Strategy (TYPSS), is for Pacific Island countries and territories (PICTs) to make greater use of common tools for statistical collections. Striving for greater harmonisation of statistical standards, classifications and systems also echoes the Pacific Leaders' request outlined in strategic objective 12.4 of the Pacific Plan.

This publication, *Pacific classification of individual consumption according to purpose 2012 (PACCOICOP 2012),* is SPC's first regional classification. Action 5 of the Pacific Statistics Steering Committee's (PSSC) Household Income and Expenditure (HIES) Technical Working Group (TWG) Meeting held at SPC in Noumea from Wednesday 3 August to Friday 5 August, 2011 recommended that SPC develop such a tool, and included an additional group to cover non-consumption expenditure.

The first draft of *PACCOICOP 2012* was circulated to price statisticians at PICTs national statistics offices (NSOs) on 3 December 2011, with a request for consultation with NSO colleagues and the provision of feedback. The first draft was also presented as a module in the course for PICTs national accountants in the gross domestic product (expenditure) [GDP (E)] organised by the Pacific Financial Technical Assistance Centre (PFTAC) from 6–10 February 2012. Having incorporated comments from NSOs and PFTAC colleagues, a second draft was circulated on 12 March 2012 to (i) HIES technical working group members, (ii) International Comparison Program Pacific (ICP Pacific) coordinator Mr Athol Maritz and Mr Robert Bradburn, both from the Australian Bureau of Statistics, and (ii) Dr Mark Sturton and Mr Glen Mckinlay, independent consultants in economic statistics to many PICT NSOs. This comprehensive peer review then led to the formulation of a third draft, which was successfully tested in Solomon Islands and Nauru. The final version was presented to and supported by the second meeting of HIES TWG held in Noumea from 15-16 October 2012.

PACCOICOP has been tailor-made for the Pacific and is expected to benefit users of economic as well as social statistics.

1. *PACCOICOP* 2012

PACCOICOP 2012 has been derived from the United Nations (UN) Classification of Individual Consumption According to Purpose (COICOP) which is a classification of expenditure according to purpose. Necessary modifications have been made to PACCOICOP 2012 to meet regional requirements and this has been done without disturbing the framework of the UN COICOP so that international comparisons can be made. This is the first regional classification for PICTs and shows household consumption on food, clothing, housing, health and education, all of which are important indicators of national welfare.

2. INDIVIDUAL CONSUMPTION

PACCOICOP 2012 identifies individual consumption expenditures incurred by three institutional sectors:

- households
- non-profit institutions serving households (NPISHs), and
- general government.

Individual consumption expenditures are those that are made for the benefit of individual persons or households. More specifically:

- a. all consumption expenditures by households are defined as individual; divisions 01 through 12 of PACCOICOP identify the purposes for which these expenditures are made;
- b. all consumption expenditures of NPISHs are treated, by convention, as being for the benefit of individual households; Division 13 of PACCOICOP identifies the purposes for which the expenditures of NPISHs are made;
- c. only some of the consumption expenditures of general government are defined as individual. Expenditures on general public services, defence, public order and safety, economic affairs, environmental protection and housing and community amenities are considered to be for the benefit of the community as a whole rather than for individual households. They are termed collective consumption expenditures and are excluded from PACCOICOP 2012. Division 14 of PACCOICOP identifies those government expenditures that are regarded as individual and classifies them by purpose, namely, health, education, social protection, recreation and culture.

3. UNITS OF CLASSIFICATION

The units of classification are expenditures for the acquisition of consumption goods and services. The basic data come from one of the following sources:

- household expenditure surveys³
- statistics on retail sales, NPISHs, government
- commodity flow estimates that involve allocating the total supply of goods and services to intermediate and final uses.

The important point to note is that the units of classification are expenditures on specific goods and services – they are not expenditures on purpose as such.

Expenditures on specific goods and services are reflected in PACCOICOP sub-classes e.g. butter, which, when aggregated to higher levels of PACCOICOP, reflects product-type classification, e.g. oils and fat, which share a similar production process and may possibly be sold in the same location in the supermarket. It is the highest level of PACCOICOP, the division, i.e. divisions 01 to 14 of PACCOICOP 2012, that convert these basic statistics into a purpose classification by grouping together the various goods and services that are deemed to fulfil a particular purpose, such as nourishing the body, preventing and curing illness, acquiring knowledge, travelling from one place to another.

-

³ HIES is conducted in PICTs on an ad hoc basis.

4. MULTI-PURPOSE GOODS AND SERVICES

The majority of goods and services can be assigned to one purpose, but some can be assigned to more than one purpose, e.g. motor fuel, which can be assigned to:

- power vehicles classified as transport
- power vehicles classified as recreational

The general rule is to assign multi-purpose goods and services to the division that represents the predominant purpose. Hence, for most PICTs, motor fuel would be shown under transport.

5. MIXED-PURPOSE GOODS AND SERVICES

Single outlays sometimes comprise a bundle of goods and services that serve two or more different purposes, e.g. the purchase of an all inclusive package tour will include payments for transport, accommodation and catering services. Outlays covering two or more purposes are dealt with on a case-by-case basis with the aim of obtaining a purpose breakdown that is as precise as possible and consistent with practical considerations of data availability.

6. TYPES OF PRODUCT

PACCOICOP 2012 classes are divided into 'services' (S), 'non-durables' (ND), 'semi-durables' (SD) and 'durables' (D). The distinction between non-durable and durable goods is based on whether the goods can be used only once or repeatedly or continuously over a period of more than a year. Semi durable goods differ from durable goods in that their lifetime of use, though more than a year, is usually shorter and their purchaser's price is substantially lower.

The classification by type of product provides for other analytical applications, e.g. to estimate the stock of capital goods held by households — goods in *PACCOICOP 2012* classes that are identified as durables provide the basic element for such estimates — or for analysing the source of inflationary pressures in the economy, such as goods inflation versus services inflation.

There are some classes that contain both goods and services since a breakdown may not be practical or not even feasible. By convention, these classes are assigned (S) since the service component is considered to be predominant e.g. a restaurant meal is a tangible product but is categorised as a service because a significant portion of its value-added comprises the preparation of the meal and other services.

7. STRUCTURE OF PACCOICOP 2012

Consumer expenditures are subdivided in a hierarchical, four-level structure of mutually exclusive categories, facilitating data collection, presentation and analysis at detailed levels of the economy in an internationally comparable, standardised way. The categories at the highest level are called divisions, which are numerically coded categories intended to facilitate economic analysis. The divisions subdivide the entire spectrum of consumer expenditure into two-digit broad groupings, such as food and non-alcoholic beverages (01), alcoholic beverages, tobacco and narcotics (02), clothing and footwear (03), housing, water, electricity, gas and other fuels (03). The classification is then organised into successively more detailed categories, which are: three-digit groups; four-digit classes and seven-digit sub-classes. For groupings at the micro level refer to SUPPLEMENTARY INFORMATION on country-specific classification derived from PACCOICOP. An example of the four levels of detail in the PACCOICOP is shown below.

| DIVISION | GROUP | CLASS | SUB-CLASS | DESCRIPTION |
|----------|-------|--------|------------|--|
| 01 | | | | Food and non-alcoholic beverages |
| | 01.1 | | | Food |
| | | | | Food products classified here are those purchased for consumption at home. It excludes: food products sold for immediate consumption away from the home by hotels, restaurants, cafés, bars, kiosks, street vendors, automatic vending machines etc. (11.1.1_264); cooked dishes prepared by restaurants for consumption off their premises (11.1.1_265); cooked dishes prepared by catering contractors whether collected by the customer or delivered to the customer's home (11.1.1_266); and products sold specifically as pet foods (09.3.4_236). |
| | | 01.1.1 | | Bread and cereals |
| | | | 01.1.1_001 | Rice in all forms |
| | | | 01.1.1_002 | Maize, wheat, barley, oats, rye and other cereals in the form of grain, flour or meal |
| | | | 01.1.1_003 | Bread |
| | | | 01.1.1_004 | Buns |
| | | | 01.1.1_005 | Biscuits |
| | | | 01.1.1_006 | Cakes |
| | | | 01.1.1_007 | Other bakery products, e.g. quiches, pizzas, pies (excluding meat pies (01.1.2_020), fish pies (01.1.3_025) and sweet corn (01.1.7_045)) |
| | | | 01.1.1_008 | Mixes and doughs for the preparation of bakery products |
| | | | 01.1.1_009 | Pasta products |
| | | | 01.1.1_010 | Cereal preparations, e.g. cornflakes, oatflakes and other cereal products, e.g. tapioca, sago and other starches |
| | | 01.1.2 | | Meat |
| | | | | Includes animals and poultry purchased live for consumption as food |
| | | | 01.1.2_011 | Fresh, chilled or frozen meat of bovine animals |
| | | | 01.1.2_012 | Fresh, chilled or frozen meat of swine |
| | | | 01.1.2_013 | Fresh, chilled or frozen meat of sheep |
| - | | | 01.1.2_014 | Fresh, chilled or frozen meat of goat |
| | | | 01.1.2_015 | Fresh, chilled or frozen meat of chicken |

8. USES OF PACCOICOP 2012

Adopting **PACCOICOP 2012** will enable a country to have the same classification scheme, where possible, for its economic statistics and this will be less confusing for its users.

Apart from being an integral part of the System of National Accounts, PACCOICOP 2012 is also used for:

- consumer price indices
- the International Comparison Program.

It is therefore important to classify the household expenditure collected from HIES using *PACCOICOP* 2012, so that data are consistent with the purpose for which they will be used.

9. APPLICATION OF PACCOICOP 2012

PACCOICOP 2012 is based on COICOP. There are instances when categories are either expanded or contracted, depending on the consumer spending in PICTs. If a particular class is of importance, the relevant classification is expanded. If some other class does not exist or is unimportant, the relevant part of the classification has been contracted.

PACCOICOP 2012 can be easily converted to COICOP since the categories at the sub-class level of *PACCOICOP 2012* are subdivisions of the most detailed level of COICOP, i.e. the four-digit level known as class. At this level the data are internationally comparable. At the sub-class level the data are regionally comparable.

10. INCORPORATING NEW PRODUCTS

It is unlikely that, during the lifetime of the current version of PACCOICOP, a new good will arise that cannot be included in one of the PACCOICOP sub-classes. It is wide enough to incorporate new products. However, it is possible that a new good or service is not listed in the examples shown in *PACCOICOP 2012*. Under such circumstances the compiler will need to allocate the product to an appropriate subclass.

11. REVIEWS

Experience in the use of consumption classifications reveals the need for a periodic review of the structure and definition of its categories and underlying principals, since changes take place in the consumption pattern of households in PICTs. Experience also reveals aspects that should be amplified, clarified or improved in other ways, while maintaining as much comparability between the revised and the preceding version. Correlation tables/concordances are suggested.

SPC should be the agency through which reviews (and revisions) should be implemented.

12. SUPPLEMENTARY INFORMATION

12.1 Country-specific classification derived from PACCOICOP

The products covered by each PACCOICOP sub-class level provide sufficient information to enable micro-classes, i.e. groupings below the sub-class level to be created. The micro-classes are more relevant to the items available in the national market. Refer to the table below which shows rice and pasta products disaggregated into commodities, i.e. various types of rice and pasta.

| DIVISION | GROUP | CLASS | SUB-CLASS | COMMODITY | DESCRIPTION | ТҮРЕ |
|----------|-------|--------|------------|----------------|--|------|
| 01 | | | | | Food and non-alcoholic beverages | |
| | 01.1 | | | | Food | |
| | | 01.1.1 | | | Bread and cereals | (ND) |
| | | | 01.1.1_001 | | Rice in all forms | |
| | | | | 01.1.1_001_??? | Basmati | |
| | | | | | Broken rice or mixed bag | |
| | | | | | Calrose | |
| | | | | | Long Grain | |
| | | | | | Par-boiled | |
| | | | | | Short grain | |
| | | | 01.1.1_002 | | Maize, wheat, barley, oats, rye and other cereals in the form of grain, flour or meal | |
| | | | 01.1.1_003 | | Bread | |
| | | | 01.1.1_004 | | Buns | |
| | | | 01.1.1_005 | | Biscuits | |
| | | | 01.1.1_006 | | Cakes | |
| | | | 01.1.1_007 | | Other bakery products, e.g. quiches, pizzas, pies (excluding meat pies (01.1.2_020), fish pies (01.1.3_025) and sweet corn (01.1.7_045)) | |
| | | | 01.1.1_008 | | Mixes and doughs for the preparation of bakery products | |
| | | | 01.1.1_009 | | Pasta products | |
| | | | | 01.1.1_009_??? | Couscous | |
| | | | | | Flour | |
| | | | | | Instant (in a cup) | |
| | | | | | Macaroni, spaghetti, etc. | |
| | | | | | Packet, e.g. Maggi | |
| | | | | | Vermicelli, including rice vermicelli, lialia | |
| | | | 01.1.1_010 | | Cereal preparations, e.g. cornflakes, oatflakes and other cereal products, e.g. tapioca, sago and other starches | |

The above example shows that PICTs can further subdivide the PACCOICOP sub-classes and create a fifth level and call it commodity. This level of classification will thus become a country-specific classification.

⁴ The question mark denotes that the countries can assign their own one-two or-three digit codes.

If, for example, a country has only one type of rice, e.g. Calrose, its country-specific classification for rice will be:

| DIVISION | GROUP | CLASS | SUB-CLASS | COMMODITY | DESCRIPTION | TYPE |
|----------|-------|--------|------------|---------------|----------------------------------|------|
| 01 | | | | | Food and non-alcoholic beverages | |
| | 01.1 | | | | Food | |
| | | 01.1.1 | | | Bread and cereals | (ND) |
| | | | 01.1.1_001 | | Rice in all forms | |
| | | | | 01.1.1_001_01 | Calrose | |

If a country has more than one type of rice, its country-specific classification for rice could be:

| DIVISION | GROUP | CLASS | SUB-CLASS | COMMODITY | DESCRIPTION | TYPE |
|----------|-------|--------|------------|---------------|----------------------------------|------|
| 01 | | | | | Food and non-alcoholic beverages | |
| | 01.1 | | | | Food | |
| | | 01.1.1 | | | Bread and cereals | (ND) |
| | | | 01.1.1_001 | | Rice in all forms | |
| | | | | 01.1.1_001_01 | Broken rice or mixed bag | |
| | | | | 01.1.1_001_02 | Calrose | |
| | | | | 01.1.1_001_03 | Short grain | |

Likewise, all the sub-classes can be expanded by making reference to Appendix 1, the Commodity Lookup Guide, which contains the many⁵ commodities bought by Pacific households.

By providing for varied levels of classification — divisions, groups, classes, sub-classes and, eventually, commodities — *PACCOICOP 2012* furnishes a framework for comparable classifications of data at different levels of detail.

12.2 Classification of non-consumption expenditure

The household expenditure survey not only collects expenditure on consumption items, but it also collects expenditure on non-consumption items, such as:

- purchase of capital items, e.g. purchase of dwellings, and
- purchase of intermediate items, e.g. purchase of fuel for operating an informal taxi business.

The UN COICOP, from which PACCOICOP has been derived, excludes capital and intermediate items. However, for the convenience of having <u>all</u> household expenditure data classified using a common hierarchy, a classification of non-consumption expenditure is included in PACCOICOP as supplementary information.

-

⁵ The intention has been to list as many commodities as possible. However, the list is not exhaustive.

| | 04.3 | | + | Maintenance and repair of the dwelling | |
| | | | | Maintenance and repair of the dwelling are distinguished by two features: first, they are activities that have to be undertaken | |
| | | | | regularly in order to maintain the dwelling in good working order; | |
| | | | | second, they do not change the dwelling's performance, capacity | |
| | | | | or expected service life. There are two types of maintenance and | |
| | | | | repair of dwellings: those which are minor, such as interior decoration and repairs to fittings, and which are commonly | |
| | | | | carried out by both tenants and owners; and those which are | |
| | 1 | | | major, such as replastering walls or repairing roofs, and which are | |
| | 1 | | | carried out by owners only. Only expenditures which tenant and owners incur on materials and services for minor maintenance | |
| | 1 | | | and repair are part of individual consumption expenditure of | |
| | 1 | | | households. Expenditure that owner-occupiers incur on materials | |
| | 1 | | | and services for major maintenance and repair are not part of | |
