

# 2020 Regional Statistics Development Workshop (10-21 February 2020, Nadi, Fiji)

Pacific Statistics Methods Board Meeting

October 28-29, 2019

SPC Headquarter, Noumea

# Background

- PSMB Meeting in April 2019 approved that Stats NZ fund another regional workshop where recommendations from the Board can be disseminated to member countries. This is part of Stats NZ's support to the work of the Methods Board
- That the sampling sub-committee (ABS, WB, Stats NZ, Cook Is, SDD) take a lead role in designing this workshop given the initial priority for this workshop was to socialise the Draft Sampling Guideline and RMI HIES experiment recommendations (as of this afternoon this has changed)
- Priorities are for NSOs with upcoming surveys/census in 2020 (with realm member countries being a priority for NZ's Government)

# Background – variation in objectives

- Workshop's scope and objectives have now changed (from when we left NZ and what we are presenting this afternoon) but it is still under the broad umbrella of supporting the Board's work
- Population Census Planning Workshop planned by UNFPA/SDD for early next year
- A quick decision was made (last night) that we should combine these two workshops and not run them separately, with a revised objectives; date; duration; location and lead agencies agreed to (99.9%)
- Location is set for Nadi (subject to cost)
- Date/duration – 2 week from 10-21 February, 2020
- UNFPA (to lead Objective 1) and Stats NZ (to lead Objectives 2&3) with SDD to take the overall coordination role and with WB and ABS to peer-review all workshop materials and provide necessary support toward facilitating the workshop
- Stats NZ and UNFPA will co-fund this regional workshop

# Workshop objectives

1. build PICT NSO capability in Census planning, methods and systems, ahead of the 2020/21 round of Pacific censuses – e.g.
  - *planning; budgeting; principles and methods; questionnaire content*
  - *CAPI questionnaire design & build; GIS*
2. disseminate PSMB recommendations based on the RMI HIES Experiment
3. gather feedback on the Pacific Sampling guidelines
  - *to ensure overall pitch and format meets NSO needs*

# Workshop focus & content – Week 1

- *Audience* – Directors / heads of PICT NSOs + Census managers
- *Content*
  - Intro to the PSMB, Sampling Guidelines, RMI HIES recommendations
  - Sampling Guidelines: *Ch1 = Introduction to surveys & sampling*
  - Census principles & methods
  - Census planning & budgeting

## Workshop focus & content – Week 2

- *Audience* – PICT NSO Census managers + Technical staff
- *Content* – to be run in parallel streams:
  - CAPI questionnaire design & build
  - GIS / mapping
  - HIES sample design
    - *Sampling Guidelines: Ch 2 - Overview of sampling theory*
    - *Sampling Guidelines: Ch 3 - HIES*
