Introduction

In April 1987 the FAO/UNDP Regional Fishery Support Programme received a request from the Government of Western Samoa for assistance in compiling a bibliography of material relating to Samoa's fisheries and marine resources. After discussions between the staff of the two organizations it was decided that the compilation of references in Apia should take place in mid-June by personnel of both the Fisheries Division and the regional fishery programme.

In Apia between June 8 and 19 twenty four offices and libraries were searched for both published and un-published references appropriate for the bibliography. At the completion of each working day a list of material located on that date was presented to the Fisheries Division staff. References of particular interest were noted, photocopied the following day, and then placed in the Fisheries Division library.

In addition to the manual searches in Western Samoa, an effort was made to locate material outside the country. Libraries and collection were examined at the South Pacific Commission, Forum Fisheries Agency, University of the South Pacific, FAO/UNDP Regional Fishery Support Programme, and several offices in American Samoa. Four computerized literature searches were carried out and enquiries were made at major Pacific rim libraries. In addition, 15 expatriate workers who had previously worked in the Fisheries Division were contacted.

The above work resulted in a list of 540 references which are arranged in this document by author and by subject. As the objective of this project was to produce a document useful as possible to fisheries workers in Western Samoa, a "user- friendly" bibliographic style was adopted.

It is strongly recommended that Fisheries Division personnel periodically update this document.

The authors wish to acknowledge the support and encouragement of the staff of the Fisheries Division. Vito Lui of the Prime Minister's Office and David Itano of the American Samoa Department of Marine Resources were also very helpful.

Location of References

At the end of each bibliographic entry in this document an acronym is given indicating where the material was found. These abbreviations correspond to the following locations:

	Abbreviation
Fisheries Division	
Laboratory B	Fish Lab
Library	Fish Lib
Conference Room	Fish Conf
